SUBSCRIPTION FOR SOIL AND WATER NEWSLETTER

The upper right-hand corner of the mailing label shows the expiration date of your subscription. Please renew immediately to avoid a break in service.

☐ Renew my subscription ☐ Start a new subscription

Enclosed is payment of $5 for one-year subscription (four issues). Make check payable to The Regents of the University of California.

Name _____

Address _____ Apt _____

City _____ State _____ Zip _____

SOIL and WATER

SPECIAL ISSUE

PUBLICATION LIST UPDATE

Richard L. Snyder
Stephen R. Grattan

Many readers of the Soil and Water Newsletter have expressed an interest in having an update of publications by Experiment Station and USDA researches associated with the Soil, Water and Agricultural Engineering Program of Cooperative Extension. This issue contains a list of publications by scientists from the Department of Land, Air and Water Resources at UC Davis, the Department of Soil and Environmental Sciences at UC Riverside, the USDA Water Management Laboratory at Fresno for 1984-85 and the USDA Salinity Laboratory at Riverside. In future issues, we will periodically update the publication lists. Write directly to the appropriate department or author to obtain reprints.

Department of Land, Air and Water Resources
Veihmeyer Hall
University of California, Davis 95616

July 1984 - June 1985

Unless otherwise indicated, copies of the following publications and reports are available from the Department as long as the supply lasts.

Ahuja, L. R., J. W. Naney, R. E. Green, and D. R. Nielsen. 1984. Macroporosity to characterize spatial variability of hydraulic conductivity and effects of land management. Soil Science Society of America Journal 48(4):699-702. July-August.

Ahuja, L. R., J. W. Naney, R. E. Green, and D. R. Nielsen. 1984. Scaling soil water properties and infiltration modeling. Soil Science Society of America Journal 48(5):970-973.

Aragues, R., K. K. Tanji, D. Quilez, F. Alberto, J. Faci, J. Machin, and J. L. Arrue. 1985. Calibration and verification of an irrigation return flow hydrosalinity model. Irrigation Science 6:85-94.

Biggar, J. W. and D. R. Nielsen. 1985. Spatial analyses of water table salinity and hydraulic conductivity prior to salinization. Pages 301-308. In Proceedings International Symposium on Reclamation of Salt-Affected Soils, 13-21 May 1985, Institute of Agricultural Resources, Environmental and Remote Sensing, Beijing Agricultural University, China.

The University of California, in compliance with the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, and the Rehabilitation Act of 1973, does not discriminate on the basis of race, creed, religion, color, national origin, sex, or mental or physical handicap in any of its programs or activities, or with respect to any of its employment policies, practices, or procedures. The University of California does not discriminate on the basis of age, ancestry, sexual orientation, marital status, citizenship, medical condition (as defined in section 12926 of the California Government Code), nor because individuals are disabled or Vietnam era veterans. Inquiries regarding this policy may be directed to the Personnel Studies and Affirmative Action Manager, Division of Agriculture and Natural Resources, 2120 University Avenue, University of California, Berkeley, California 94720, (415) 644-4270.

SOIL AND WATER is a quarterly newsletter of UC Cooperative Extension Specialists in Land, Air, Water and Plant Sciences. The subscription cost for four issues per year is $5. Checks should be made payable to THE REGENTS OF THE UNIVERSITY OF CALIFORNIA. Mail to: Agricultural Publications, 6701 San Pablo Avenue, Oakland, CA 94608-1239. (See order form on back page).

Editors
Stephen R. Grattan
Richard L. Snyder

Contributing Specialists:

David Goldhamer, Area Soils and Water Specialist--San Joaquin Valley
Stephen Grattan, Plant-Water Relations Specialist
Robert Hagan, Water Specialist
Blaine Hanson, Irrigation and Drainage Specialist
Jewell Meyer, Irrigation and Soils Specialist
Roland Meyer, Soils Specialist, Fertility and Fertilizers
Jim Oster, Soils and Water Specialist
Stuart Pettygrove, Soils Specialist, Fertility and Waste Mangement
Steven Post, Area Irrigation and Soils Specialist
Terry Prichard, Area Soils and Water Specialist--Stockton
James Quick, Technologist, Soil, Water and Plant Analysis
Herbert Schulbach, Area Soils and Water Specialist--Colusa
Richard Snyder, Biometeorologist
William Wildman, Soils Specialist, Management, Remote Sensing, Land Use

van Genuchten, M. Th., and P. J. Wierenga. 1985. Determining dispersions coefficients and retardation factors. In A. Klute (ed) Methods of Soil Analysis. Am. Soc. Agron. J., Madison, Wisconsin. (In Press)

van Schilfgaarde, Jan., and J. D. Rhoades. 1984. Coping with Salinity.. In "Water Scarcity", Impacts in Western Agriculture", Ernest A. Engelbert (ed.), University of Calif. Press. 6:157-179.
