

B&A Planning Group

Passion to create better communities, together.

Energy & Resource Development

Our firm excels at preparing conceptual design for aggregate operations, mineral quarries, landfill sites, sour gas wells and power generation facilities. We have in-depth experience in managing multi-jurisdictional regulatory approvals while working with operating and reclamation experts from a wide variety of disciplines.

In addition to securing approvals, we also provide expert testimony and reports for proponents or intervenors appearing before the Alberta Energy and Utilities Board, the Natural Resources Conservation Board and the Municipal Government Board.

Our Services Include

+ Aggregate operations

+ Mineral quarries

+ Landfill sites

+ Power plants

+ Oil & gas facilities

+ Expert witness testimony
