

# Department of Crop & Soil Science

## Student Choice Seminar

---

Conservation agriculture, organic farming and agroecology:  
The three musketeers of sustainable food systems

Tuesday, April 07<sup>th</sup>

Johnson Hall 343

11:00 – 12:00 pm

Dr. Martin Entz

Martin Entz is a professor in the Department of Plant Science at the University of Manitoba, where he focuses his research on cropping systems and natural systems agriculture. He devotes much of his research efforts to organic production systems, including the Glenlea Long-Term Rotation Study and the Organic Crops Field Laboratory at Carman, MB. Other research interests include the rotational benefits of traditional and novel legumes, self-regenerating cover crops, and perennial grains.
