Informational webinar comparison between the two types of horizontal fall protection available.
Agenda

• Introductions
• Fall Protection System Overhead Product Overview
  • Rigid Vs Cable
• Product Performance
  • Site Conditions
• Product Applications
  • Pros/Cons
  • Indoor/Outdoor
• Decision Considerations
Fall Protection Systems

- Number 1 fall protection provider in the U.S.
- Over 20 years of experience in fall protection
- Custom Engineered Solutions
- Full Turnkey Implementation
- Self Install Kit Options
- Comprehensive Onsite Analysis
Presenters

Rick Gass

• Director of Engineering at FPS
• Bachelor of Science in Industrial Technology & Masters of Engineering Management
• 12 years of experience in the fall protection industry
Presenters

Steve Csuha

• National Accounts Manager at FPS
• Bachelor of Science in Mechanical Engineering
• 5 years of experience in the fall protection industry
• Qualified FPS system trainer

Cable Fall Protection
QUESTIONS?
Product Performance

• Site Conditions
  • System Location
  • Environment
  • Frequency of Use/Maintenance Intervals
  • Working Height
  • Support Spacing
  • Anchorage
  • Fall Distance/Deflection
  • Fall Arrest or Restraint Option
  • Number of Users
  • Installation Conditions
Deflection
Deflection
Rigid Rail Vs Cable

- Deflection During the Fall
- By-Pass Capability
- Inspection
- Possibility of a Swing Fall
- Possibility of Secondary Falls (due to Oscillation)
- Number of Users
- Applications
- Installation
- Support Spacing
- Building Loads
QUESTIONS?
Decision Considerations

- Overall Plan
- Operator Convenience
- Operational Costs
