

Lockout/Tagout Quiz

Name: _____ Date: _____

Multiple Choice (circle the correct answer):

1. The elements of an energy control (lockout/tagout) program include:
 - a. Procedure(s) for locking and tagging out equipment
 - b. Employee training
 - c. Periodic inspections of lockout/tagout activities
 - d. All of the above
2. Which of the following is an example of an energy isolating device?
 - a. Circuit breaker
 - b. Disconnect switch
 - c. Gate valve
 - d. All of the above
3. Affected employees must be trained on:
 - a. Electrical troubleshooting
 - b. Basic wiring techniques
 - c. The purpose of the energy control procedure(s)
 - d. Ohm's law

True or False:

4. _____ Lockout locks must be substantial enough to prevent removal without use of excessive force.
5. _____ An affected employee is a person who locks or tags out machines or equipment in order to perform servicing or maintenance on that machine or equipment.
6. _____ It is not important to test or verify that a piece of equipment is de-energized. Energy isolating devices rarely fail.
7. _____ Tagout devices must be singularly identified and not used for other purposes.
8. _____ Push buttons, selector switches, and other control circuit devices are considered energy isolating devices.
9. _____ Lockout/tagout must be performed by authorized employees.
10. _____ Stored non-electrical energy may include: pneumatic, hydraulic and tension.

Quiz Key

1. D
2. D
3. C
4. True
5. False, authorized person
6. False
7. True
8. False
9. True
10. True
