

Lunch Box Safety Webinar

Safety Over Sandwiches

June 13 • Confined Space Entry

Presented by Joe Mlynec, Progressive Safety Services LLC

Supervisor Talking Points

- **As a group discuss the following:**
 - The types and locations of permit required confined spaces entered at the facility.
 - Different types of entry points on confined spaces (side, top, etc.).
 - Types of hazards that may be faced (engulfment, electrical, moving equipment, temperature extremes, etc.).
 - Types of equipment required for safe entry (lifelines, harnesses, retrieval, PPE, etc.).
 - Types of equipment that may need to be isolated prior to entry (mechanical equipment, spouts, gates, etc.)
 - Proper operation of atmospheric testing equipment to include bump testing.
 - Communication requirements between entrant and attendants (radio, visual, voice, etc.).
 - Proper completion of the Company's permit required confined space entry permit.
 - Procedures for contacting rescue services.
