

Pear Pruning Demonstration 2020

When: February 12, 2020 @ 1pm

**Where: 2951 E Richared Rd Monitor, WA.
47.479950, -120.412164**

It is critical that we get enough light into our canopies for good bud development. Large abundant fruit are the goal. Pruning is critical for good spray coverage. Keep those psylla at bay next year.

This year we will focus on managing light in mature canopies:

- Look for a big cut in the top of the tree in shady canopies.
- Simplify.
- Detail pruning.

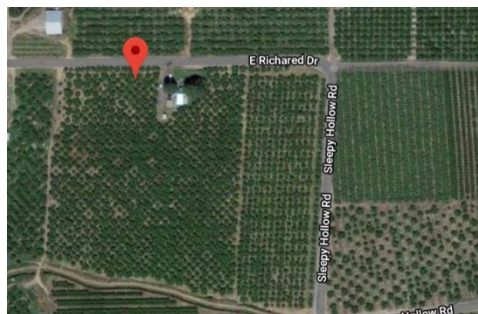

Dr. Stefano Musacchi will be on hand to offer wisdom. Pruning demonstrators will include John Tall, Ray Schmitt, Sam Parker, Dave Piper, Rudy Prey, Shawn Cox, Greg Hardnen.

Structure:

- We will break up into five to six groups.
- Each group leader will cover major strategies.

No registration. No fee.
