

# The role of dendrometers for irrigation management in apple

What is a dendrometer? How can we use this tool to improve the precision of irrigation management and fruit quality? Join WSU extension in a webinar designed to learn about dendrometers and how we can use these tools in the tree fruit industry.

---

**When:** August 20, 2020

**Time:** 2:00 to 2:45 pm

**Registration is free !**

**Link:** [https://wsu.zoom.us/webinar/register/WN\\_j9dCoKoRQja52S1ggsNtlg](https://wsu.zoom.us/webinar/register/WN_j9dCoKoRQja52S1ggsNtlg)

## Agenda

- ✓ **2:00 -2:05 pm. Introduction**
- ✓ **2:05 -2:15 pm. Dr. Giverson Mupambi, Extension Assistant Professor** from the University of Massachusetts will present technical information about dendrometers and what they measure. He will also share his experiences using them in apple crops in South Africa.
- ✓ **2:15 -2:25 pm. Dr. Lee Kalcsits, Associate Professor** from WSU-TFREC, will provide us with more examples about the use of dendrometers in apple production and why tree fruit growers should be interested in using this technology in their orchards.
- ✓ **2:25 -2:35 pm. Q&A session**
- ✓ **2:35 -2:45 pm. Survey**
