Eric Berne, M. D.
Carmel
California

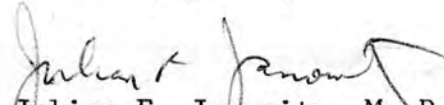

Dear Dr. Berne:

I wish to extend my thanks to you and admiration after reading "Transactional Analysis." For most of the past year I have found it extraordinarily pertinent and helpful. The response to your work by the Mental Health Staff here and the neuropsychiatric clinic staff (of which I was a chief while in the army) is equally appreciative.

I was a resident at Langley Porter from 1955-1959, heard you speak, received some of your reprints, but never realized (perhaps was not ready) how valuable this framework might be to me. Have you other material or is further work to be published in the immediate future? I would appreciate information about where I might obtain same.

Thank you.

Sincerely yours,

Julian F. Janowitz, M. D.
Director of Mental Health
