AIDS

HOW BIG DOES IT HAVE TO GET BEFORE YOU TAKE NOTICE?

If you believe nothing else, believe this. AIDS is a very serious threat to the health of this country. As many as 30,000 people are already infected. The disease is incurable. If a cure is to be found, it'll take time.

Facts

Anyone can catch the AIDS virus. Women as well as men. As many as 30,000 people already have. The disease is incurable. If a cure is to be found, it'll take time. And don't worry. But if you do, never share. For more information, please the confidential telephone service.

AIDS DON'T DIE OF IGNORANCE

Gay or straight, male or female, anyone can get AIDS from sexual intercourse. So the more partners, the greater the risk. Protect yourself. Use a condom.

AIDS

How are you going to get it before you take notice?

Gay or straight, male or female, anyone can get AIDS from sexual intercourse. So the more partners, the greater the risk. Protect yourself. Use a condom.

AIDS IS NOT PREJUDICED

It can kill anyone.

Gay or straight, male or female, anyone can get AIDS from sexual intercourse. So the more partners, the greater the risk. Protect yourself. Use a condom.
These facts should shake up everyone. Men and women can and do give the AIDS virus to each other during sexual intercourse.

At the moment the infection is mainly confined to relatively small groups of people in this country.

But the virus is spreading.

An infected man has the virus in his semen. An infected woman has it in her vaginal fluid.

The problem is someone can be infected and not even know it. In fact, most look perfectly healthy.

Think. If they can't tell, you certainly can't.

So the more sexual partners you have, the greater the risk. Either stick to the one faithful partner. Or, always use a condom. It's safer for both of you.

People who inject drugs face the added danger of infection if they share needles or equipment.

These facts should shake up everyone. Men and women can and do give the AIDS virus to each other during sexual intercourse.

So don't inject. But if you do, never share.

For more information, phone the confidential Healthline.

DONT DIE OF IGNORANCE

1. Anyone can get AIDS. Men or women.
2. Already 30,000 people have the virus.
3. More people are infected every day.
4. Most people with the virus don't even know it.
5. AIDS is incurable and it kills.

THE HEALTHLINE TELEPHONE SERVICE:
01-981 2717, 01-980 7222 or 0345-581151
If dialling from outside London, use the 0345 number and you will be charged at local rates.

Or write for more information to Dept A, PO Box 100, Milton Keynes, MK1 1TX.
