

14 December, 1973

Dr. Jack deGroot
Professor of Anatomy
1334 Sciences

Dear Jack,'

The Australian neuroanatomist who is studying the behavior of quokkas and who is likely to enjoy a collaborative study involving the marsupials is:

Professor Byron Kakulas
Department of Neuropathology
University of Western Australia
Perth, W. Australia

His name was given to me by Professor L. Stanley, and Australian visitor.

Just for information, at the moment! I look forward to the discussion!

Yours aye
