No. P-9429-D
 Date submitted: 9-15-76
 Date reported: 7-15-77

Identification:

JOE ALVERNAZ

CROP: SWEET POTATO

Sample No.	Description	NO ₃ -N	PO ₄ -P	SO ₄ -S	N	P	K	Ca	Mg	Na	Cl	B	Zn	BR DRY BASIS PPM
		ppm	ppm	ppm	%	%	%	%	%	%	%	ppm	ppm	
1	3A													312
2	3B													320
3	4A													318
4	4B													372

SO₄-S **Sulfate-Sulfur** – The inorganic sulfur fraction in the dried and ground sample, expressed as ppm sulfur in the dry plant material.

All other elements determined as total elemental content and expressed as percent or parts per million of dry plant material.

Critical Concentrations**

CROP	PLANT PART	SAMPLING TIME	NO ₃ -N ppm	PO ₄ -P ppm	SO ₄ -S ppm	K %	B ppm	Zn ppm
Alfalfa	midstem	1/10 bloom		700	250*	0.75	25*	
Sugar Beets	petiole of recently matured leaf	anytime during growing season	1000	750	250*	1.0		10*
Ladino Clover				600		0.8		
Sub Clover				600	170			
Grapes	petiole opposite flower cluster	bloom time	T.S. vqr. only 226			0.8	25	15

Approximate Adequate Nutrient Levels***

Cotton (San Joaquin Valley)	petiole of recently matured leaf	July 1	10,000	1000		6		15*
		July 15	5,000	1000				15*
		August 1	2,000	1000				15*
		August 15	1,000	1000		2.5		15*
Potato	petiole of 4th ma- ture leaf from top	days from planting < 70	8,000	1200		9		
		70-90	6,000	800		7		
		over 90	3,000	500		4		
Tomato process- ing crop	whole plant top less blades	thinning or transplant	1,500	1500		1.5		10*
		set	6,000	1800		2.5		10*
	petiole of recently matured leaf	1st color	2,000					10*
		1st pick	300	700		0.75		10*

* Level in blades of recently matured leaves.

** The nutrient concentration below which plant growth begins to decrease.

*** The approximate nutrient level at various growth stages below which the crop yield may be reduced.

These values are based on present information. Your cooperation in completing and returning "followup" sheets will add greatly to the development of more and better interpretation data on a wider range of crops.

LABORATORY WORK REQUEST

County MERCED Submitted by ROBERT W. SCHIEUERMANN
Date sampled 9-13-76 Send report copies to R.D. MEYER, A.L. BROWN
Identification R. VOSS, & R.G. BURMAN
Sampling location JOE ALVERNANZ LIVINGSTON, CA
Where possible give 1/4 of 1/4 of Sec. T R (Required for Water)
Crop SWEET POTATOE Soil type _____ Drainage _____
Irrigation method _____ Water source _____
No. of samples 4 Soil, water, plant, feed, misc. (circle one only)
Plant part sampled: Petiole, blade, mid-rib, grain, whole tops, mid-stem: LEAVES
Analyses requested B+
Project No. or problem description _____

Sample No. Description (for plants, include age, stage of growth, or cutting)

1. 3A
2. 3B
3. 4A
4. 4B

Refer to PA-1061
for Root sampler
