CONSTRUCTION BIDS are now being sought on this architect's proposal for UCI's Physical Sciences Unit I.

**Newsmakers**

**Dinner Dance**

A Spring formal dinner-dance sponsored by the ASUCI will be held May 16 at the Newport Inn. All students, faculty and staff are invited to attend. The Newport Band will provide music, and a comedian from Los Angeles will add entertainment for the evening.

The cost of the dance will be $10. Tickets 7 to 8:30 p.m. and will depart from UCLC at 1 p.m.

**Extension Workshop**

"Byrd's Eye" is the title of a series of experimental theater pieces to be staged by the University Extension New Art Workshop. The program will be held Wednesday, April 7, at 8 p.m. in the Science Lecture Hall. All students, faculty and staff are invited.

**Business Group Forms at UCI**

A Business Advisory Council has been formed on the Irvine campus. As a sub-committee of the Newport Harbor Chamber of Commerce, the purpose of this organization is to acquaint students with the nature of the many challenges found in a career in business.

**SRT Presents Third Play**

"Six Characters in Search of an Author," Luigi Pirandello's classic of modern drama, will be the third presentation for the Student Repertory Theatre. Opening Friday, April 7. Seven "Characters" will be performed three nights, April 7, 8 and 8:30 p.m., in the UCI Studio Theatre. An earlier scheduled opening was postponed to avoid conflict with other events on campus.

According to Robert Cohen, SRT director and professor of drama, "Six Characters" is one of the most perplexing and provocative plays of all times. It caused a revolution in theater when it was first presented and has gained in importance as the world has become more ready for it." SRT's successful run of three, one-act comedies closed last week with a visiting performance at the Orange County Lounge.

**Buffalo Springfield w ill be featured in a dance and show in the Student Center.**

The New York Stock Exchange will present the light show at the annual dance and show. The show will feature the Buffalo Springfield. Tickets are $3, and UC Irvine students may purchase tickets from the Office of Undergraduate Affiliations on a first-come, first-served basis.

**Pre-sale UCI tickets are limited to two tickets per student. Tickets are now on sale in the Activities Office and snack bar.**

Argument for Gene Manipulation

The modern advocates of programs to birth control and voluntary sterilization, it is alleged, seek only to avoid the hardship of the business of bare existence in the midst of extreme poverty and squalor. Unfortunately they are not deterred by the conditions of existence from carrying on with the business of reproduction: and their mean family size is very high. Their misery and improvidence is as reported by the Health Service. To improve the character of our species on the biological grounds George Milwee, Jr., commented, "It is unnecessary to decide whether the number of stupid people, to become parents, is too great. If the number of stupid people is to be decreased, the best way to decide the children of stupid parents are to escape from an unfavorable combination of genes or because of the parents, deleterious to the environment. The task in either case is to persuade stupid people not to become parents.

Paul G. Neiman struck at both: "What deeply bothers me regarding the data "is that we are free to apply eugenics is that the children of persons to accept Huxley's premise that the prime dignity of science is the ethical condition of whether or not any man or group of men ever have the right to tell another group or group to marry or how many children a group may have been gratuitously sterilized."

Huxley's ideology will still have to be pursued in order to have that to advance science with sound-ness."

Brian Stewart wrote, "Minsky perceives the peril of authoritarianism, of racism and the lack of conclusive means of identifying desirable and undesirable hereditary traits. Against these dangers must be placed the grave consequence of the psychological and de-sensitization of those who are interested in the program may contact Lieutenant Colonel Moser, GE 4-5077.

... Conclave Lacks Affirmative Voice

UCI's spring Conclave will be without a speaker to focus on ideas proposed in the Conclave: Genetic Cures for Social Ills. Only person opposed to the- Gurors that science may be escaped. Unpleasant decisions will still remain as to which genes to "correct" and what kind of corrections to make. Should gene manipulation be achieved, these tentative and pragmatic decisions will still remain as to which genes to "correct" and what kind of corrections to make. Should gene manipulation be achieved, these tentative and pragmatic decisions will still remain as to which genes to "correct" and what kind of corrections to make.
