Index

Expt. 1
  2 RNA Synthesis
  3 Polio RNA in SDS Gradient
  4 Effect of Actino on Normal + Infected Cells
  5 Repeat of Expt. 4 (diff. conc.)
  6 Repeat of Expt. 4 (diff. conc.)
  8 Phenol Extraction of HeLa RNA
  9 Polio Purification + Polyphosphoric Acid
 10 Phenol Extraction of Infectious RNA
 11 Double-label
    Channel Settings
  12 Pulse @ 3 1/4 post infection
  13 Extraction Procedures ( DEA: - phenol - SDS-phenol)
  14 Extraction Procedures
  15 Double-label
    C^14 + H^3 Standards
  16 Purification of RI pulse labeled H^3
  17 Purification of RI long label H^3
  18 Purification of RI pulse H^3
  19 Purification of RI P^32 label
  20 C^14 Uridine Incorp in PO4 free + Regular Media
  21 P^32 RI - purified ( cellulase-cel) Base Ratios
  22 RI long H^3 label ETH4 added + chromatographed
      Super-chromatographed - run on new + old sucrose
      Polio Purification
    Experiments ( phenol - SDS-phenol - denature) in sucrose
  24 P^32 Polio - phenol ext. Base Ratio
  25 Host Cell Turnoff + 5'-G in Infected Cells
  26 Host Cell Turnoff Repeat of Expt. 25
  27 Polio C^14 Uridine Incorp. in presence of Guanidine
  28 Repeat of Expt 27 (proteins worked out)
  29 C^14 Uridine Incorp. (Norm, Infected + injected + G)
  30 Cytoplasmic Extracts ( vis + OD & 7% RNA + 8x hosts)
  31 HeLa Cells + Actino
  32 Host Cell Turnoff a.a. in corp.
  33 Cytoplasmic Extracts + OD + P^32 amts of RNA
  34 Host Cell Turnoff a.a. in corp.
    P^32 Polio
Expt. 35  Host Cell Turnover in Influenza Virus + T + W - G
 " 36  Effect of G on Uninfected Cells
 " 37  Extraction Procedures on Long - phosphoryl RNA
 " 38  U. U. incorp in presence of varying amt. G & W in uninfected cells
 " 39  C^14 Phalanine, C^14 Urdine incorp. in normal
 G, G + methionine, actino treated cells
 " 40  Extraction for RI
