UCI SOCIAL SCIENCE COMPLEX will feature an eight-story tower, a four-story classroom building and a 200-seat lecture hall pavilion.

Social Science Complex Planned

A school of social sciences with a commitment to breaking the traditional mold of teaching students with analytical skills is being developed in the new Division of Social Sciences at the University of California, Irvine. Dean, Dr. James March, believes that the social sciences have developed at the physical sciences' disfavor, an unfair monopoly on the part of student who in the past has been given too much physics," March said.

He hopes to do this at Irvine by developing introductory courses which "will demonstrate to the student the sheer artistic delights of analytical problem-solving in the social sciences."

March maintains that the physical sciences have gained an unfair advantage in recruiting students with mathematical and analytical skills, whereas the social sciences are presented to high school students as a dull and academic curriculum balance with the added element of freedom to concentrate on individual areas of specialty.

The architectural theme will be "The University's commitment to qualified education, but with deep concern for the efficient and effective use of the resources made available by the people of California."

The document was submitted to the UC Regents at their September meeting. Board members are expected to forward their recommendations to the State administration in October.

The budget report emphasizes the University's continuing efforts to make the most effective use of its resources and to achieve economic advantages at the University. It includes fiscal requirements programs through 1973, including academic planning with the sum required.

Harry Wellman, former acting president of the University, pointed out that the 8.4 per cent increase requested for the 1969-70 academic year is the expected 8.4 per cent increase in wages, rentals, and student loans.

The California College of Medicine will require an additional $302,000 for enrollment increases. The report pointed out that the additional $302,000 is proposed for trying out computer facility development as required at the three newest UC campuses.

The conference of about 150 scientists from throughout the world was held in Academgorodok, a suburb of Novosibirsk, the Soviet Union's new center for the industrial, educational and scientific development of Siberia. Academgorodok literally means "little science city" and is a community devoted wholly to science.

"It's a little easier to appreciate the emphasis the Russians are placing on science when you realize Academgorodok's one's enter about five years ago," Rowland said.

Rowland estimated the city of Novosibirsk has a population of about one million and Academgorodok has about 35,000. Accommodating the importance of the development, Rowland observed that one of Russia's two major competing cities is located at Novosibirsk. The other is in Moscow.

Rowland said he did not feel there was a nationalistic approach to the presentations. He particularly noted that two different Russian positions were being argued at the symposium and the Russians seemed to be able to present each other openly at the meetings. The façade of traditional American expression is in contrast to the American scientists.

"They have a strong national pride in their scientific advances during the past few years," Rowland said.

Although there was obvious national pride of accomplishment by both the Americans and the Russians attending the conference, Rowland said he did not feel there was a nationalistic approach to the presentations.

The University of California, Irvine, believes that the social sciences are presented to high school students to make them aware of the social sciences, economics, anthropology, geography, psychology, political science, and sociology, the building also will accommodate offices for use in the social sciences program and will be devoted primarily to a student directed learning center for social sciences.

"The University's continuing efforts to qualitatively improve education, but with deep concern for the efficient and effective use of the resources made available by the people of California."

Entertainment

Ellis Band to Play For Festival Opening

The Don Ellis Big Band, originally scheduled to perform during the Sunday evening concert of the upcoming Second Annual Pacific Jazz Festival, has been re-scheduled to perform for the Festival’s opening commencing Friday evening, October 6. The Thursday five-concert Festival will be held October 6, 7, and 8 on the Orange County Fairgrounds, Costa Mesa.

The Bola Sete Trio which had been scheduled to perform Friday evening will not appear because of other commitments.

The program of the Friday evening concert, which begins at 8:15 P.M., in The Don Ellis Big Band, the Thad Jones-Mel Lewis Band, The Modern Jazz Quartet; The Vince Guaraldi Trio and The Four Freshmen.

Paintings Shown

Watercolours by Dolph Smith will be exhibited October 1 through 29 at the Bowers Museum, 2002 North Main Street, Santa Ana. Currently one of the most popular watercolours artists of the Mid-south, Smith graduated from the Pennsylvania Academy of Arts in 1960. He is an instructor at The Memphis Academy and Southwestern Colleges.

His work has been published several times in the national magazine “Ford Times.” His work was exhibited in the 1965 “Watercolor USA” and the American Watercolor Society of New York shows in 1966.

Klaus Muller, director of the teacher training program at the University of South Carolina, will speak at an open lecture Friday, October 6, at 1616, Muller will speak on the teacher training program in the author of the first-year German text book, “Modern Deutsches Sprachlehre,” and the American. The lecture will be held in the L.A. Conservatory of Music; the UCLA Conservatory of Music; and the American. The lecture will be held at UCLA for this same Brer Rabbit act. Despite her Daisy Mae drawl she was a Philosophy major and had not learned much German at UC Berkeley, will speak at an open lecture Friday, October 6, at 1616, Muller will speak on the teacher training program at UC Berkeley.

The Berkeley staff member is the author of the first-year German textbook, “Modern Deutsches Sprachlehre,” which is used by the department of foreign languages and literatures at UCLA.

Any news about Rock that does not come by radio is old. Hence, the phenomenal success of Bobbie Gentry into the million-seller category in four weeks with “Ode to Billie Joe” needs little fanfare. The Top Forty, however, has been a long-time residence for one-shot successes and talented gimmick monsters who strut and fret their brief hour upon the Ed Sullivan stage, and then are heard no more. The real question, which is never asked on radio for it has a relaxing hypnotic quality, is how good will Bobbie Gentry be when the Boss Jocks run out of flower palaver?

First, I suspect, we can discount this “Cajun country” publicity hullabaloo that has been the obligatory person of “folk singers” ever since Leadbelly was sprung from jail by Harvard for this same Brer Rabbit act. Despite her Daisy Mae drawl and childhood tales of Chickasaw County, Mississippi, Miss Gentry is clearly a sophisticated performer. In fact, it is delightful to see how good will emanate from a girl of her background. Having lived in that rural Bayou area of California known as Palm Springs since her teens, she was a Philosophy major at UCLA and studied Theory, Composition, and Counterpoint at the L.A. Conservatory of Music; then, she apparently pursued aspirations as an actress in little theater groups and eventually reached that cherished compromise of the serious show biz girl: a Las Vegas dancer.

Knowing this, how can one explain her nervous appearance on opening night at the Greek Theatre last week? Well, for one thing, she just wasn’t her audience. She was a late addition to Roger Miller’s show which featured the American, most of the people, attending had only a vague notion of who she might be. For the record, the Young Americans are the most nauseating horde of clean-cut cutsey-pie kids since Dick and Jane were superceded by Ken and Barbie. I couldn’t believe the whole thing wasn’t straight out of a TV toothpaste ad. This chorus of 36 upstanding young citizens presented a super patriotic freshmen frolic that would have embarrassed most high schools. But, by contrast, Roger Miller was ripping off his hits with amazing non chalance and sprinkling the show with surprisingly funny repartee, which, I am pleased to hear, actually offended none of the complacent boors in the audience.

Anyway, add to Bobbie’s problem an unsupervised job as sub jargon - by incompetence by the Greek Theodore orchestra, and one can see how the might be vogue. Why the musicians’ lid doesn’t sink the cards of even buster-dingered toddler in that gregation is a mystery to me.

Gentry’s Metoric Ascent Result of Polished Talent

The Second Time
&

The New York Chamber Soloists, an ensemble of tenor voices, two winds, three strings and a keyboard, will open the UCI concert season Saturday, October 14, at 8 p.m. in the Science Lecture Hall. Tickets are now available at the fine arts box office, open 11 a.m. to 2 p.m. daily.

Santa Ana
I wish to note that is to be found in a number of contexts, in a variety of settings, in the context of a number of initiatives, it is a concept that consists of a rather confusing set of interacting factors. One is the changes in the American university experience that are now becoming prominent in the changing demographics of the students. If one takes a close look at the current state of the public school system, one can see a dramatic shift in the direction of student participation in academic affairs and the misconceived guilt about the responsibilities that the students themselves bear that accompanies it. A third is the increasing number of students who are taking such courses. This is a particularly important consideration since the number of students who are taking such courses can be quite large, particularly in the case of large universities. The fourth is the increasing number of students who are taking such courses. This is a particularly important consideration since the number of students who are taking such courses can be quite large, particularly in the case of large universities.

Some years ago, a few especially innovative universities introduced a program that caused a great deal of excitement. The program was designed to provide an introduction to the world of scholarship for all students. It was a program that was designed to provide students with a basic understanding of the nature of scholarship and the role of the scholar in society. The program was designed to provide students with an introduction to the world of scholarship for all students. It was a program that was designed to provide students with a basic understanding of the nature of scholarship and the role of the scholar in society.

This whole movement to elevate the status of the scholar (as it is defined in the context) is an attack on scholarship because it is a fundamental notion of status which is inimical to the nature of scholarship. In effect that each man who has the status of "student" is equal to the status of the scholar because one has the status of student. It is a fundamental notion of scholarship. A scholarly community is not, however, a political or social sub-division, and neither political nor social. In effect it is only political. In effect, if each man says that he is scholarly, then he must be equal to the status of the scholar. There is only one such man, and that man is equal to the status of the scholar.

Scholarship has no significance.

This is an old and hackneyed complaint. What has not been so hackneyed is the evidence of the fact that there are very few vice-presidents in the nation. There have been very few vice-presidents in the nation in recent years. There is a need for a new approach to the problem of scholarship.

Recently my colleagues have been devoting a great deal of time to the study of the status of the teacher. They have been trying to discover which teachers are doing what. They have been trying to discover what is being done by the teachers in the classroom. They have been trying to discover what is being done by the teachers in the classroom.

There are other ways of learning about the status of the teacher. There are other ways of learning about the status of the teacher. They have been trying to discover what is being done by the teachers in the classroom. They have been trying to discover what is being done by the teachers in the classroom.

Students Desire Less Work

What students demand always boils down to - not understanding, but understanding. The danger of requiring students to understand is that the important role of understanding is put on the back burner. Students demand that the importance of understanding is put on the back burner. Students demand that the importance of understanding is put on the back burner. Students demand that the importance of understanding is put on the back burner.

I welcome you today, hot a big and gleeful hoodlum in a red and white uniform, but a student in a suit and tie.
We tell students that the best way to get ahead in this world is to stay put.

Stay in school, complete your education. This is the way to a good job and all the rewards that come with it (and we don’t mean just financial ones). That is the message we put across whenever we help them now, everybody (including you) will believe.

We believe that our career-counseling sessions, and the scholarships, fellowships and college grants we provide, are encouraging more young people to complete their education. Standard Oil is trying to help young people discover more about themselves ... and the world they live in.

The Chevron — Sign of excellence

American Field Service (AFS) scholars who are interested are forming a “renewer” club. UCI call Mary Wiley, RA Otero (6651) or Bill Corbin (6873).
Irvine Poloists Capture Six-Team UCI Tournament

By RON TAKEMOTO

Led by All-American Bob Nealy, last year's most valuable player Bill Leach, and "big" Pat McClellan, a freshman from Corona del Mar, the UCI water polo Anteaters crushed Cal State Los Angeles 17-2, mort USC 6-4, and subdued Long Beach State 19-8, to capture the UCI water polo tournament last Saturday at Irvine.

In the opening match of the six-team tournament, Coach Newland's Anteaters demolished the small and inexperienced Cal Irvine in the game. Superb passing by LA State enabled Irvine to move into a 5-2 halftime lead.

In the second quarter Pat McClellan, named the best high school water poloist in the country in 1966 and one of the main reasons for the bright water polo outlook at Irvine, exploded with six goals in two quarters to personally crush Long Beach State 13-3, giving the Anteaters the UCI tournament championship. McClellan, who led Corona Del Mar High to the 1966 CIF championships, tamed up with Steve Farmer to give Irvine a 5-2 halftime lead. The Anteaters extended their lead to seven in the third quarter and added two more goals in the final quarter to clinch the initial meet of the season.

Final varsity scoring statistics for the Fullerton game revealed that Feidie Massamino and Pat McClellan both scored three, while Farmer and Mannin Nealy each added one.

Football and volleyball Highlight Intramurals

With the opening of school at Irvine, flag football, volleyball and badminton became the focal points of Irvine's intramural sports programs.

Football and volleyball start on October 16, while badminton competition begins on October 25. All entries, however, must be filed before October 10.

An adequate number of students who were unable to attend should contact the equipment room and the intramural sports administrators for each organization plan.

A special registration card for each organization plan must be turned in to the equipment room. All entries, however, must be filed prior to entering Irvine; Bob McKeel, a 6'5" All-American, the "communicator" from Dominguez High School, was coach by Mt. Tifft from Dominguez High School and takes over as varsity assistant coach for Irvine. He plans to start his second year and hopes to compete in two sports.

A program start- ing October 16 is organized on a league basis. Residence Hall teams against the independent League. All students living in any of the campus residence halls, as well as freshmen and sophomores, are eligible to compete. The fall intramural intramurals, students should contact their intramural sports managers (one in each dorm). Students interested in forming a team for competition in the intramural program should obtain an application blank from the recreation sports office.

Students not connected with any group, but who wish to join a team, should submit their names, addresses, telephone numbers and names of the sports in which they wish to compete to the recreation sports office.

Students may secure locker and equipment by presenting registration cards to the equipment room assistants in the men's and women's locker rooms on campus.

Students interested in sports and money are desperately needed to serve as football officials ($1.37 an hour). Interested students should contact the sports recreation office at once and should have some knowledge of football rules. Jobs with the same wages are also open for students as assistant recreation supervisors.

Additionally, students who are interested in the recreation sports programs, including flag football, soccer, karate, fusky, rugby, swimming, sailing, squash and surfing, may contact the sports office or phone 683-6931. Those clubs have scheduled intramural-off campus events for the '67-'68 school year. An adequate number of interest-

For answers to any questions concerning intramural sports, students may contact their intramural sports administrators in the men's and women's locker rooms on campus.
An Invitation

TO THE UCI STUDENT BODY

The School of Social Sciences wants UCI to be an exciting place for EVERYONE. We are committed to the creation of a new educational environment which gives each student and faculty member the fullest opportunity to develop himself and his area of life work. We think our policies, old and new, reflect this concern.

WE BELIEVE EACH STUDENT SHOULD RUN HIS OWN LIFE

So . . . The School of Social Sciences requires only 27 courses for a major, including breadth requirements and the hotly debated math requirement.

. . . Individual study can begin in the freshman year — all you need is an idea and one faculty member to give you the course number to develop it under.

. . . Choice of advisors — and the choice not to be advised.

. . . The right to pass any course by examination.

. . . The opportunity to create your own courses.

WE BELIEVE THAT EXCELLENCE OF SCHOLARSHIP IS THE FOUNDATION OF THE UNIVERSITY. SEEKING EXCELLENCE, AS WELL AS RELEVANCE, THE SCHOOL HAS REORGANIZED.

We have three interdisciplinary programs, centered on contemporary problems and techniques in the Social Sciences, which we expect to replace disciplinary departments over the course of the next several years.

This will mean new courses; an example is Soc. Sci. 5 — an experimental alternative to Soc. Sci. 1, and a reorganization of undergraduate education in the Social Sciences.

WE BELIEVE THAT EACH STUDENT SHOULD BE ABLE TO PARTICIPATE TO THE FULL EXTENT OF HIS INTERESTS AND CAPABILITIES IN THE CONDUCT OF THE UNIVERSITY.

Last year we had general seminars and a Dean's cabinet. They met with only limited success. This year we would like to form a Society of Junior Fellows. The ground rules are still being formed, but the idea is to have able students join with the faculty in all levels of University affairs.

WE INVITE THE UCI STUDENT BODY TO WORK WITH US DURING THE COMING YEAR TO GIVE SUBSTANCE TO THESE PLANS, TO OFFER PLANS OF YOUR OWN, AND TO HELP US IN DESIGNING A HEALTHY, CREATIVE EDUCATIONAL ENVIRONMENT FROM WHICH WE WILL ALL BENEFIT.

EVERY FRIDAY afternoon at 1:00 there will be coffee and discussion in the Social Science Lounge, Room 300 HSS. Everyone is welcome.

LET US HAVE YOUR IDEAS AND COMMENTS.

The Faculty, School of Social Sciences
