When: Thursday, July 9, 2020 9am – 12pm PST

Forestland Safety & Security Workshop

Learn what you must know to keep yourself and your land safe from uninvited and malicious trespassers. In this online workshop, we will examine common circumstances ranging from the “slightly-annoying” to the fatally-serious. Topics covered include:

- characteristics of criminals and how to react
- trespass, graffiti, vandalism, target shooting
- dumping (of garbage like tires, furniture, appliances) and hazardous waste (toxic chemicals)
- verbal threats, abuse, and harassment; impacts to victims
- thefts, including timber thefts (logs; figured wood bolts) and poaching of both wildlife and plants (mushrooms, greenery, moss, medicinals)
- dope labs and grows, often booby-trapped with guns or other devices to prevent access, or offenders that are heavily armed
- violent crimes like arson, homicide, and other most serious hazardous situations

Presenter:

Paul Figueroa, WA State Dept. Agriculture – Forestry Specialist (ret.)

There is no fee, but pre-registration is required. Due to increased security, you must have [your own Zoom account](#) to participate in this ONLINE WORKSHOP. You can easily [create a free Zoom account](#) if you do not already have one. **Important:** you must have your Zoom account set up and be registered for the workshop **at least two hours** before the workshop start time. <https://zoom.us/signup>

Those registered will receive a confirmation email with instructions for connecting to the online workshop.

****Limited to first 30 registrants on a first-come, first-served.**

To Register, [email WSU Extension](#), or call (509)667-6540 (if no answer, leave a message with your contact information). Questions about the program? Andy Perleberg, andyp@wsu.edu (509)630-4217 mobile

Any person wanting to participate and who feels s/he may need an accommodation based on the impact of a disability should contact Andy Perleberg privately to discuss your specific needs. andyp@wsu.edu
