Here's how this super simple online application works...

In your online dashboard, choose your very own personalized local phone number. (show list of local numbers

The number you choose is specific for your local area code, in the town where you're selling your properties.

Next, create a list for your incoming calls. ("Orlando Buyers;" also show other lists already created..."Jacksonville Buyers" "Cleveland Buyers").

Designate where you want your calls to go.

Forward the call to your cell phone, your office, an assistant, a sales team member, real estate agent, or any person on your team. It's best to forward your Lead Capture Number to a LIVE person.

Next, advertise this phone number on all your marketing materials...your website, postcards, letters, mailers, or classified ads.

Now, when a buyer responds to your marketing piece and calls your 'Lead Capture Number,' their phone number is automatically captured and tagged and placed on the list you created.

Since each Lead Capture Number is tied to its own list, you know exactly which city your investor/buyers are interested in.
