

LIQUID FOUNDATION SWEET TIPS

- Ideal for Active lifestyles; Perspiration-proof and water resistant, while letting the skin breath• 18+ hours of beautiful skin
- Full coverage without a heavy or cakey feel
- Contains no talc, perfume, dyes, or harsh chemicals
- Very soothing to the skin, great for sensitive skin, does not contain Bismuth, a common cause of irritation in mineral makeup.
- Non-comedogenic and hypoallergenic
- Contains Zinc and Titanium which provides natural physical sun protection.
- Available in 10 shades!

DIRECTIONS

Moisturize with a Sweet Minerals Moisturizer and allow to dry.

Using the Sweet Minerals Beauty Blender: Wet Beauty Blender and squeeze out excess moisture. You want the sponge to be barely damp.

Apply foundation to the back of the hand or a flat surface and dip the rounded end of the Beauty Blender into it.

Apply foundation by stippling or bouncing the Sweet Minerals Beauty Blender all over the face. *Do not drag or press into the skin too hard; the beauty blender sponge will create a seamless airbrush look.*

Use the pointed end of the beauty blender and dab underneath the eye, working your way to the inner corner of the eye, where you need the extra coverage.

Dip the rounded end of the Beauty Blender into Sweet Minerals Veil or Defuse and pat into the skin to set for the day! *(You may also use the Sweet Minerals MultiTasker Brush.)*

Note: The Sweet Minerals beauty blender also works with your Sweet Minerals dry Concealer!

Using the Sweet Minerals Kabuki: Start by pumping a 1/2 to 1 pump Liquid Minerals into your Sweet Minerals Kabuki Brush. Touch the face with a light stroke on the forehead, cheeks, nose, and chin.

Go back and blend in a circular motion until Foundation is completely blended. Finish with a light dusting of Sweet Minerals Veil or Defuse to set for the day!

KEY INGREDIENTS

- **Aloe Vera** - *Antioxidant-rich including beta carotene and Vitamins C & E to improve skin's natural firmness and hydration*
- **Coconut Oil** - *Skin Conditioner that won't leave an oily residue, antibacterial properties to help heal skin*
