

Polish

RICE ENZYME EXFOLIANT

WATER-ACTIVATED face polish

SWEET TIPS

SKIN

- A water-activated, unscented, biodegradable foaming exfoliant of nourishing Japanese rice powder that transforms to a creamy foam for smooth, polished skin.

- *The Polished Rice Enzyme Powders provide non-abrasive exfoliation to create a smooth texture to the skin.*

- **Just add water!**

- Formulated with sodium cocoyl isethionate, a natural surfactant derived from coconut oil that aids in foaming & helps water mix with oil and dirt to rinse away grime. Combined with powerhouse MSM and Rice Enzyme Powder in a potent yet gentle product that instantly leaves your face soft & smooth.

DIRECTIONS

Pour a nickel-sized amount into your hands and add water. Scrub and rinse as needed.

INGREDIENTS

Baking Soda, Zinc Oxide, Corn Starch, OptiMSM, Citric Acid, Sodium Cocoyl Isethionate, Rice Powder.

KEY INGREDIENTS

OptiMSM - *The world's purest methyl-sulfonylmethane (MSM), people use it most often to try to treat arthritis. In skincare, OptiMSM may reduce fine lines and wrinkles, improve skin texture and elasticity, and provide overall support to the structural integrity of the skin. MSM may also help the skin, hair, and nails regain and retain a more youthful appearance.*

KEY INGREDIENTS

Sodium Cocoyl Isethionate - *A sodium salt ester, or a fatty acid derived from coconut oil. As a surfactant, it creates a wet feeling, it solubilizes oils and reduces surface tension, leaving a clean rinse; can aid in foaming as well.*

Baking Soda - *In addition to being a natural exfoliant, baking soda helps to balance the PH of our skin. This is crucial to maintaining a clear, and even skin tone.*

Citric Acid - *Often used to treat skin imperfections such as acne, dark spots, clogged pores, sun damage, and fine lines and wrinkles. Mainly derived from citrus fruit and some species of berries.*

Rice Powder - *Natural, anti-aging and oil-absorbing properties. Ideal for oily or acne-prone and/or dull mature skin. It's also a good anti-inflammatory and skin brightening agent that soothes sunburned skin and makes skin smooth.*
