

2018 Cotton Foliar Trial AgriCenter International, Memphis TN

The purpose of this trial was to determine the effect on cotton yields when applying BorPak foliar in a Western Tennessee cotton production system. Two applications of BorPak was applied during the growing season, each treatment consisted of a 16 oz. /acre rate at pin head square and 1st bloom. The BorPak program was compared to untreated cotton plants in the same field.

Variety:	DP1646B2FX
Planting Date:	5/18/2018
Harvest Date:	11/21/18
Planting Rate, Unit:	55000 S/A
Depth, Unit:	0.75"
Row Spacing, Unit:	38"
Tillage Type:	Conv.
Soil Type:	Falaya Silt Loam
