

As of September 2016,
CustomFit can't change
the stitch pattern of
a sweater part-way
through. But you can
use CustomFit to
make your own Tidal
Pool with just a
bit of work!

TIDAL POOL

TIDAL POOL BY AMY HERZOG

WHAT'S A MASH-UP?

CustomFit can't do everything! Some of my designs, like Tidal Pool, can't be built directly into CustomFit.

Mash-up worksheets help you use CustomFit to get as close as possible to a custom version of a sweater that's not built directly into the site. They work like this:

1. Make sure you have a CustomFit measurement set, and swatch as described here to get your custom gauge.
2. Generate a CustomFit pattern via the "Build Your Own" pattern wizard, using the choices listed; this costs \$9.99.
3. While you follow your CustomFit pattern, **also** follow any special instructions for the piece you're knitting, **at the same time**. This means you're following 2 files as you knit!

SWATCHING

please swatch in St st
use a sport weight yarn

NOTIONS

Stitch markers, stitch holder, darning needle

OVERVIEW

Tidal Pool is a very simple A-line pullover to which textured stitch patterning has been added. It is extremely simple to reproduce using CustomFit - you'll simply switch both the front and back to the texture pattern 2" (5 cm) before the armhole shaping, and continue in Texture to the end of the piece.

BUILD YOUR OWN CHOICES

Once you've swatched and entered your measurements into CustomFit, create your starting pattern by going to the "Build Your Own Pattern" wizard at

<https://customfit.makewearlove.com/design/custom/>

Please use these choices:

- Silhouette: A-line
- Construction: Sleeved Pullover

Neckline:

- shape: scoop
- width: average
- depth: .5" (1.5 cm) above armhole
- edge height: .75" (2 cm)
- edge stitch: 2x2 ribbing

Sleeves:

- length: 3/4
- shape: tapered
- edge height: 1" (2.5 cm)
- edge stitch: 2x2 ribbing

Hem:

- length: long
- edge height: .75" (2 cm)
- edge stitch: 2x2 ribbing

After entering in these choices, if you'd like to ensure the a-line shaping is very slight, click "customize fit specifics" and confirm that the hip measurement gives you around 6" (15.25 cm) of positive ease.

BACK SPECIAL INSTRUCTIONS

Work as described in your CustomFit pattern until your piece measures 2" (5 cm) before the armhole shaping.

Work 2 rows in Seed Stitch.

Switch all stitches to Texture Chart, repeating vertically as necessary, to end of piece.

FRONT SPECIAL INSTRUCTIONS

Work as described in your CustomFit pattern until your piece measures 2" (5 cm) before the armhole shaping.

Work 2 rows in Seed Stitch.

Switch all stitches to Texture Chart, repeating vertically as necessary, to end of piece.

SLEEVES SPECIAL INSTRUCTIONS

None - work as specified in your CustomFit pattern.

FINISHING SPECIAL INSTRUCTIONS

None - work as specified in your CustomFit pattern.
