

## Music by Qualia Plus

### Daniel Schotsburg ~ Master Musician

I had the pleasure of meeting and working energetically with Daniel Schotsburg in June of 2013. When I first heard his music, I knew his compositions enhanced ones ability to connect with higher realms of consciousness. From that moment on, I knew our meeting was destined.

This collaboration is Spirit directed and it is our utmost heartfelt desire to be of service to humanity.

Daniel has graciously offered a special package for the full versions of the music you have experienced during the Alchemy of Sound 13 Day Journey series.

For more information and to more fully understand his music, please visit his website at <http://www.qualiaplus.com/>

The music used during this series is as follows and can be purchased by visiting his website <http://specials-alchemy.qualiaplus.com/>

Day 1 - Meta Level Blue 1

Day 2 - Meta Level Green 1

Day 3 - Meta Level Red 1

Day 4 - Meta Level Violet 1

Day 5 - Meta Level Blue 2

Day 6 - Meta Level Green 2

Day 7 - Meta Level Red 2

Day 8 - Meta Level Violet 2

Day 9 - Meta Level Violet 1

Day 10 - Meta Level Blue 2

Day 11 - Meta Level Red 2

Day 12 - Meta Level Violet 2

Day 13 - Meta Level Green 2

## About Daniel

Daniel Schotsborg is a musician, composer, producer, scientist, entrepreneur and philosopher from the Netherlands. A graduate of the Conservatory for Music in Amsterdam, he is currently pursuing a Masters in Music.

A dedicated student of personal growth since the young age of 11, Daniel's journey of personal awakening has been largely influenced by the study of everything from Buddhism and Rosicrucians, to the great minds of Sri Aurobindo, Gurdjieff, Tolle and Pythagoras.

His current music/compositions, through his company Qualia+ sounds, have been released through Mindvalley's Omvana and Dormio website applications, reaching almost 50,000 user downloads to date.

Daniel is currently pursuing a Master's degree in Music, with a Master of Philosophy program to follow next year. Within the Master of Philosophy program, he will research, in cooperation with the Dutch Free University, the affects of sound on the human brain.

"Where others see obstacles, I see opportunities. I have a dream of developing a scientifically proven method to heal through sound. My research and passion has lead me into laboratories and discussions with neuroscientists researching the affects of sound on human consciousness. My dream is to compose music that will produce e.g. hormones to activate the dormant / passive brain regions, while providing a beautiful sound experience for the listener."

Daniel's goal is to compose music that naturally enhances the advancement of human consciousness, going beyond what is scientifically known around the positive impact of sound.

Just imagine the possibilities...

**"Music is the mediator between the spiritual and the sensual life."**

Ludwig van Beethoven
