Red... it's power is to awaken those aspects of life that are still asleep. This dissolves illusion, releasing strong emotions ... be aware where they come from, and allow them to flow through you without engaging them.

Color Quality * **Surround yourself with romance.**

Magenta... it removes past life memories and the irrelevant distorted experiences of dreams, thereby promoting restful sleep. It helps dissolve the fake identity of personality, so that authentic expression can be experienced. Listen to your inspiration.

* **Color Quality** * **Every praiseworthy thing you find in another, becomes your own.**

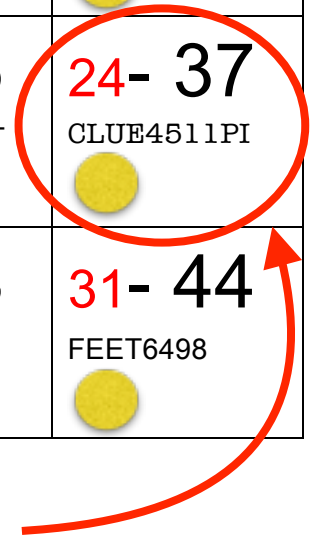

Violet... the idea of there being a «past,” is an illusion. We are all living one eternal moment. This color releases the influence of «past» experiences on the moment. Release the ability of past failures or successes to define you.

Color Quality * **Be abundant with yourself and others**

Yellow: April

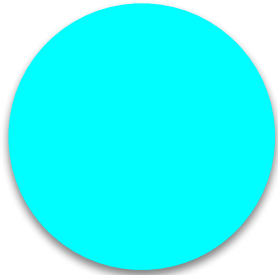

Color Properites & How to Express Them

Turquoise: April, May, June

Golden yellow... everyone experiences key moments; pivotal momentary turning points that change one's life. In mastery, these come from insights gained, but they can also come from interactions with others that change the way we see ourselves and our world – from social conditioning. The social conditioning that defines our world views is dissolved in this color.

Color Quality ***Follow your inspiration and joy.**

Turquoise... eliminates density; it creates a comfort zone around one, in which you can walk in holiness. Focus on carrying heaven on Earth wherever you go. Think only the most beautiful thoughts possible, that your sanctum remains unpolluted. This color helps prevent the agendas of others from cording you, and assists in maintaining self-sovereignty.

Color Quality **Know yourself through the desires of your heart.**

Green: June, July, Aug

Sky Blue: Aug, Sept, Oct.

Emerald green... this color removes chemical and radiation pollution from the body, and also emotional «scarring» -- trauma held in the cells and organs. Contemplate past injustices, pain and guilt you may harbor, and let it go completely, that you may set yourself and others free from the illusion of the roles everyone played in the dreams of your past. Purify your body and emotions, by refusing to eat unwholesome foods, or to hold onto resentment.

Color Quality: * **Removing vitality from past events by withdrawing your attention.**

Sky blue... eliminates the emotional pollution of others being absorbed by you through the empathic abilities of a master you have developed. It also repels any deliberate attempts to manipulate your emotions. Question the sentimental values social conditioning has given to certain experiences, that you may escape the bondage of judgements of the heart.

Color Quality: * **Telepathic communication with the aliveness of all things.**

Color Properites & How to Express Them

White light... the capabilities of the white light include the forming of a shield of invisibility around you against any ill intent, as well as the agendas of others to manipulate or bind you. Release protectiveness in all areas of your life. Observe where you express protectively to avoid the vulnerabilities you believe you have within and release them. Approach your environment with the confidence of a fully actualized master.

- **The Mystical Qualities of the White Light**

The uniqueness of each individuated being, has been formed by deliberate areas of suppressed expression. These areas formed scar tissue (distortions of expression) to fill the gap left by unexpressed perception. This white light contains unaccessed potential that restores wholeness by filling the gap instead (replacing illusion with untapped perception).

Color Quality *Doorways into the Reality of High Magic, it is a time for walking in a holy temple; a time for reverence and disconnecting from the profane.
