

ALPINE SNOWGUARDS®

SNOW BIRD

Classic. Versatile. Strong.

1. 2 3/4" height ideal for synthetic slate & shake
2. Optional rods transform pad-style snow guard into pipe-style; can be installed before or after installation
3. 18" strap length makes it an ideal snow guard for 18 roof types

COMPATIBLE ROOF TYPES

New / Existing Slate · New / Existing Synthetic Slate or Shake
 New / Existing Composition (Asphalt) Shingle · New / Existing Cedar Shingle · New / Existing Flat Tile · New / Existing French Tile

SNOW BIRD SNOW GUARDS

SNOW BIRD CLASSIC DESIGN

- Installs on 18 roof types & pairs with dozens of roofing manufacturers
- 1,000lb ultimate snow load in stainless steel or copper plated stainless steel*
- Can be used on new or retrofit roofs
- 2 3/4" snow guard height is effective option for synthetic slate & shake
- Offers excellent snow retention with an historic aesthetic

*Copper-plated parts are sealed to prevent permanent discoloration during the production process. This sealant inhibits the natural patina process for 2-3 years.

ALPINE SNOWGUARDS

Alpine SnowGuards' products are designed, engineered, and proven through extensive 3rd party testing to prevent the dangerous sudden release of snow and ice from a roof. After thousands of install points over the last 25+ years, Alpine's snow guards have been confirmed to protect the watertight integrity of the roof as well.
