

# HELLEBORUS PACIFIC FROST

Known to push its flowers up through the snow, this welcome herald of spring is a lovely perennial, that adds color to the shady garden. Though not a true rose, belonging instead to the buttercup family, Helleborus are commonly known as Lenten Rose, as they often flower mid-winter, during the Christian season of Lent.

'Pacific Frost' features large, leathery, variegated leaves comprised of three spiny-toothed leaflets, and clusters of creamy green, bowl-shaped flowers, making for a very showy display. The stunning evergreen foliage of 'Pacific Frost' is heavily speckled and stippled with cream or white and pink, and the young shoots are pink.

*Variegated leaves and clusters of creamy flowers make a showy display!*

## Pacific Frost Essentials:

- ❄️ Upright, irregular habit
- ❄️ USDA zones 6 to 9
- ❄️ Mature size 2'H x 3'W
- ❄️ Leathery, evergreen foliage; variegated green, heavily speckled with cream or white and pink
- ❄️ Blooms late winter to early spring; clusters of creamy green to ivory, bowl-shaped flowers
- ❄️ Moist, well-drained alkaline soil that is high in organic matter; part to full shade

This is the perfect plant for naturalizing in moist, woodland areas, where it will spread as far as it is allowed. 'Pacific Frost' performs best in regions with a mild maritime climate, planted in part to full shade, in average to moist soils. In colder climates, it should be heavily mulched with leaves around the base of the plant, in very late fall.
