

***A Spirited Take on a
Tried & True Favorite***

VIBURNUM

Spirit

More vibrant color, longer lasting blooms, and a more compact habit give 'Spirit' a clear edge over other Viburnum tinus cultivars.

The closed buds are pinkish-red, that open to delicate white flowers. In late fall to early winter, 'Spirit' bears dark purple berries, sometimes carrying fruit and flowers at the same time, creating quite a visual feast!

- More compact than other Viburnum tinus
- Much longer flowering season
- Foliage is more brilliantly colored
- Flowers and purple berries carried at the same time in late fall to early winter
- USDA Zone 7
