Warranty Administration / Claims Management

Current Challenges

Dealers can't find people with the right technical skills

Learning curve for the position is steep

Recent surveys indicate high likelihood of attrition

Mistakes in processing can have significant financial impact

- Receivable write-offs due to time or errors
- Reduced cash flow when processing is delayed
- OEM compliance issues can be costly

Introducing warrantymind AI

Let the experts handle your claims processing

- Analysts have minimum 10 years experience
- Deep knowledge of the claims process, and auto technical skills
- Entire team behind each analyst

End-to-end claims management

- Coding warranty lines & closing R.O.'s
- Filing each claim / fixing anything required for approval
- OEM Compliance checks
- Reconcile warranty receivables
- Weekly review with dealership management
