Henry Ford Health System is expanding clinical services and is seeking highly qualified anesthesiologists to work at a new clinical site in Jackson, Michigan. This new location just north of Ann Arbor will be fully integrated into all departmental activities.

Jackson is a city in the south-central area of Michigan. This low cost of living town strikes the perfect balance of downtown excitement, rich history, natural beauty, culture, outdoor fun and accommodations.

Henry Ford Health System, one of the largest and most comprehensive integrated U.S. health care systems, is a national leader in clinical care, research and education. The system includes the 1,200-member Henry Ford Medical Group, five hospitals, Health Alliance Plan (a health insurance and wellness company), Henry Ford Physician Network, a 150-site ambulatory network and many other health-related entities throughout southeast Michigan, providing a full continuum of care. The health system also is a major economic driver in Michigan.

The Department of Anesthesiology has a long history of excellence in patient safety, multidisciplinary team-focused patient care, as well as education and research. Its board-certified anesthesiologists are at the forefront of providing advanced technologies for safe delivery of anesthesia to patients, managing more than 50,000 surgical procedures and more than 10,000 Pain Center patient visits every year.

The Department includes more than 60 senior staff anesthesiologists as well as physicians-in-training (residents and fellows) and certified registered nurse anesthesiologists.

An attractive compensation and comprehensive benefits package is available including relocation package, loan forgiveness program, and mortgage assistance for those wishing to settle in Jackson.

Bay Area Day Trips
Explore popular neighborhoods and attractions in San Francisco

San Francisco: The cultural, commercial and financial center of Northern California that is home to Silicon Valley and to the 49ers Football Team. Founded in 1776, this hilly city is known for more than its iconic Cable Cars and the Golden Gate Bridge. San Francisco is also known for its cool summers, fog, eclectic architecture, and landmarks. With so much history and culture packed into just under 48 square mile, take some time out of your schedule to visit some of the Bay Area’s popular neighborhoods and attractions. Be sure to wear a jacket and comfortable shoes!

Alcatraz Island
The Alcatraz Federal Penitentiary (Alcatraz for short) is located on the island and operated from 1934 to 1963. During its time, Alcatraz held some of America’s most ruthless criminals such as Al Capone, George “Machine Gun” Kelly and Ellsworth “Bumpy” Johnson as well as prisoners who repeatedly caused trouble at other federal prisons. Today, Alcatraz is a public museum operated by the National Park Services and offers ferry passes and tours of the penitentiary.

Chinatown
San Francisco has the largest Chinatown outside of Asia and is the largest Chinese community in North America. It was established in 1848 and is steeped in the history and culture of ethnic Chinese immigrants in America. Chinatown’s restaurants are considered the birthplace of American Chinese Cuisine, introducing such food items as Chop Suey and Dim Sum to Western and American tastes; its Dim Sum tea houses remain a major tourist attraction. Walking tours are available to take in the history, the art and culture of Chinatown. Enjoy the great restaurants and shopping.

Crissy Field
Crissy Field is a place to walk or bike - offering breathtaking views of the Bay and the Golden Gate Bridge. Formerly a US Army airfield, thanks to restoration by the National Parks Conservancy, the area now has beaches, picnic tables and windsurfing. Warming Hut and Beach Hut Cafés are on site for grabbing a bite to eat.

Mission District
This gentrified Latin neighborhood is home to the famous Roxie Theater and to five restaurants that have received 2017 Michelin stars. Mission has four sub-districts: The northeast is known as the center for high tech startups and chic bars and restaurants. The northwest is famous for their Victorian mansions and for Dolores Park a popular recreation area. The Valencia corridor and the 24th Street corridor (Calle 24) are popular for their restaurants, bars and galleries.

Muir Woods National Monument
Hikers and Bikers alike will revel in this redwood forest located 12 miles north of San Francisco. It is part of the Golden Gate National Recreation Area and one of the few redwood forests remaining along the Pacific Coast. Fifty species of birds, 11 species of bats and a myriad of mammals from Sonoma chipmunks to black bears have been spotted along throughout

CONTRIBUTOR: TAMARA THOMAS
the forests. A paved main walking trail begins at the entrance, travels alongside redwood creek and into the old growth forest. Bikers are only permitted on designated roads.

nps.gov/muwo/index.htm

North Beach

North Beach is near Fisherman’s Wharf and Chinatown, and is San Francisco’s Little Italy with a large Italian American population. Part of the old Barbary coast, the neighborhood was formerly home to Jack Kerouac, Allen Ginsburg and Joe DiMaggio. Today North Beach is best known for its ristorantes, caffes and old-world delicatessens. Washington Square Park and Beat Museum are also fixtures in this beloved neighborhood.

sftravel.com/explore/neighborhoods/north-beach

Richmond District

Richmond District (not to be confused with the city of Richmond some 20 miles north of San Francisco) is a melting pot of cultures, restaurants and theaters. The city is also called Little Russia represented by East Asian, Indian, Ethiopian, Russian and other world influences. The most famous Restaurant in Richmond District is Sutro’s Cliff House, known for its magnificent views of the Bay and its seafood menu.

sftravel.com/explore/neighborhoods/richmond-presidio

Sausalito

Before the building of the Golden Gate Bridge, Sausalito was a rail, car and ferry terminus. It’s hard to imagine that this wealthy artistic residential enclave was previously an industrial ship building city during World War II. Sausalito has a fishing pier, public beaches and a thriving houseboat community. The city also boasts unique tours and attractions, boutique shops, outdoor cafes, bistros, art studios and galleries.

ci.sausalito.ca.us/

Sonoma Valley

No trip to San Francisco would be complete without a tour of one of California’s world famous vineyards. Sonoma Valley is known as the birthplace of the California wine industry, with hundreds of vineyards ranging from small family-owned holdings to large international wineries. The Sonoma region is also home to wilderness areas like Armstrong Redwoods State Preserve and to beaches surrounding Bodega Bay.

For immediate consideration, please email your CV to: tristines@pagny.org or apply online at: www.pagny.org
ANESTHESIOLOGISTS – UR MEDICINE/GOLISANO CHILDREN’S HOSPITAL

UR Medicine/Golisano Children’s Hospital at Strong Memorial Hospital Department of Anesthesiology and Perioperative Medicine has the following opportunities:

CHIEF OF PEDIATRIC ANESTHESIOLOGY will be a BC Pediatric Anesthesiologist with fellowship training and significant experience as an academic anesthesiologist. Applicants should be eligible for appointment as Associate or full Professor at the University of Rochester, and have strong organizational and interpersonal skills that will enable him/her to be a successful leader. The Pediatric Anesthesia group is home to nine fellowship-trained pediatric anesthesiologists providing service for over 7000 pediatric surgical cases and 1800 pediatric procedures annually. The division has a successful fellowship with 1 position annually that has been filled with excellent candidates every year since accreditation.

PEDIATRIC CARDIAC ANESTHESIOLOGIST will be BC/BE Pediatric Cardiac Anesthesiologist with fellowship training in pediatric or cardiac anesthesiology or significant experience. Open to all ranks. The pediatric cardiac anesthesia group provides service for over 500 pediatric cardiac surgical and cath lab cases annually including complex single ventricles; approvals are in place to begin a VAD/transplant program. Opportunities exist to provide care outside the cardiac OR, particularly for general pediatric, cardiac, or general anesthesia cases based on experience and preferences. Call is primarily for pediatric cardiac cases.

The University of Rochester is an equal opportunity employer, offering a competitive compensation package with substantial benefits. Please visit our web site at www.urag.net. Send inquiries and CV with contact information for 3 references to: Michael P. Eaton, MD; Denham S. Ward Professor and Chair, Dept. of Anesthesiology and Perioperative Medicine, 601 Elmwood Ave., Box 604, Rochester, NY 14642, Tel: 585-275-5639, e-mail: michael_eaton@urmc.rochester.edu

Ad for Johns Hopkins Bayview Medical Center – CRNAs

Exceptional and exciting opportunity for full time CRNAs at Johns Hopkins Bayview Medical Center, Baltimore, MD. Johns Hopkins Bayview Medical Center is an exciting and dynamic teaching institution, Maryland’s only accredited Burn Center and a Level 2 Trauma center.

Work side by side with highly experienced CRNAs and physicians while providing top level care in a care mix that includes orthopaedic, complex vascular and neurosurgery. Join a team who not only provides excellent patient care, but also engages in hospital wide initiatives to maintain quality patient care.

We offer a comprehensive salary program and excellent benefits including tuition remission, in a smoke/drug free workplace. Qualified applicants only please email CV’s to: lwhetze1@jhmi.edu.

Johns Hopkins University is an equal opportunity/affirmative action employer committed to recruiting, supporting, and fostering a diverse community of outstanding faculty, staff, and students. All applicants who share this goal are encouraged to apply.

Johns Hopkins University is an equal opportunity employer and does not discriminate on the basis of race, color, gender, religion, age, sexual orientation, national or ethnic origin, disability, marital status, veteran status, or any other occupationally irrelevant criteria. The university promotes affirmative action for minorities, women, disabled persons, and veterans.
As hospitals strive to remain profitable and competitive in today's health care environment, the addition of a Physician Advisor (PA) to the administrative staff is viewed as not only good for business but also as good for patients.

Once a role typically filled by physicians who were nearing retirement, the Physician Advisor has evolved into a position that is part compliance expert, part patient care coordinator, and part hospital administrator. The PA's role is to perform in an advisory capacity with:

- Utilization of Hospital Resources (Level of Care and Length of Stay)
- Documentation and Compliance
- Clinical Review of Patients
- Medical Necessity Protocol
- Care/Case Management with Physicians and Staff
- Quality of Care Provided
- Referrals to Alternative Facilities (Physical Therapy, Hospice, etc.)
- Insurance Claims (Appeals of Denials)
- Informing Physicians About Regulatory Changes
- Informing Staff About ICD Code Changes and Interpretation
- Patient Satisfaction
- Physician Peer Review

The Affordable Care Act outlines specific guidelines for the unique role of a PA as the job is complex and exists to serve both the provider (hospital) and the patient. This pivotal position serves as a bridge between the hospital's clinical staff and the administrative staff and works to improve communication on all levels. As a result of this increased interaction between physicians, staff, and patients, the patients receive better care.

With the ever-changing compliance environment, a PA must stay informed and current about every aspect of patient care from quality of care to medical necessity guidelines. The PA serves as a liaison to ensure that the patient receives appropriate care and that all medical services rendered are correctly submitted for reimbursement. When necessary, the PA coordinates the appeal process if an insurance claim is denied.

What Knowledge and Expertise Do You Need?

A medical degree and experience in utilization management is the ideal background for a PA. Degrees in Internal Medical, Family Practice, or Emergency Medicine are particularly useful due to the broad background provided by these specialty areas. Naturally, other specialty areas of medicine can also provide the appropriate background to perform well as a PA. Success as a PA is always...
dependent on the unique combination of training, experience, and temperament of any given individual.

Medical knowledge is integral to the PA’s role in peer review activities as well as in the process of appealing health insurance claim denials. Because the PA coordinates and supervises a wide range of activities with the hospital’s medical and administrative staff as well as with patients, their families, and health insurance carriers, excellent communication skills are a necessity.

Temperament Is Key

Is a PA role right for you? Even if you have a stellar background in medicine and can point to years of success as a physician, a PA position may still not be a good fit for you. The successful PA brings a broad medical knowledge to the job as well as a comprehensive understanding of utilization management and necessity of care protocols, an interest in keeping current with compliance and insurance regulations, and a passion to deliver quality care to patients. But there is still one key ingredient that can’t be taught in any medical school or hospital setting – temperament. Do you have the communication skills of a seasoned diplomat to help you navigate the choppy waters when you must make a recommendation or suggestion that is contrary to what a physician has ordered or what the staff is accustomed to providing in a similar case? Always maintaining that delicate balance between advisor and advocate is the mark of a successful and valuable PA.

In addition to the daily interactions with physicians, patients, patients’ families, and hospital staff, a PA also has to commit to a heavy load of committee work and meetings on topics such as “Quality of Care,” “Safety,” and “ICD 10 Updates.” Attending (or running) these topic-specific meetings and/or workshops is integral to the successful performance of a PA’s duties.

This is an exciting and growing area of medicine – one that has a direct effect on a hospital’s bottom line. As a PA, you can not only ensure that your hospital receives every reimbursement dollar that is appropriate from insurance, but you also assist in helping the hospital achieve increased patient satisfaction and better health outcomes for its service area.

Why you should consider UCAA.

Quality of life:
Growing micropolitan: top 15 in the USA.
Noted as one of the top places to retire in the USA.
Tennessee tech university. 12,500 students.
Noted as best value university in Tennessee.
Multiple cultural opportunities. Plays, orchestra, division 1 sports, etc.
Unlimited renowned outdoor recreation: 10 state and national parks within 1-1/5 hours, including the great smokies and big south fork national recreational area
3 world class lakes within 30 mins. Center hill and dale hollow featured on national tv.
Nashville international airport is 70 miles away. No intercity driving to fly away. Regional airport with jet length runway.
32,512 population. Big enough to have multiple retail and recreation opportunities, but small enough for short commutes and a sense of family.
Nationally recognized waterfalls. 3 within 45 mins
Financial.
Competitive salary with generous retirement.
Low cost of living. Typically 15-20% less then Nashville and Knoxville.
No state income tax.
Local taxes are in the lower 1/3rd of comparable micropolitians in Tennessee.
Local, city owned hospital. No corporate decisions made. Ccmc is managed by an administration that answers to a board of citizens.

The length of parental leave time taken by new parents has been shown to significantly impact the parent-child bonding process - influencing the infant's brain development, while also mitigating post-natal depression for the mother. Research has also shown that enhanced paternal leave can significantly impact the father's subsequent long-term engagement with the child.

Enabling mothers to stay at home with their newborns not only increases the likelihood of breastfeeding, associated with health and emotional benefits for child and mother, but also increases the likelihood of early childhood checkups and immunizations.

With all these benefits, it is hard to imagine that society does not make it easy for new parents to spend this important time with their newborns, and that the United States is one of only six nations that does not give working mothers universally paid maternity leave.

A Call for 12 Weeks Paid Leave

The American Academy of Pediatrics (AAP) has called on Congress to enact laws to grant new parents 12 weeks of paid leave to help them bond with and care for their new infant. At present, American workers are entitled to take up to 12 weeks unpaid leave under the Family Medical Leave Act (FMLA) of 1993. However, there is no guarantee that new parents will be allowed to take the full 12 weeks by their employers.

It would seem logical that physicians would have the most informed family and parental leave policies, yet the profession calling for this improvement is among the worst served by parental leave policy. According to a new study in the Journal of the American Medical Association, physicians feel that they are letting partners, colleagues and patients down if they take their full entitlement, so even when physicians are permitted to take the full 12 weeks, they do not.

Policies & Planning

With the lack of standardization in policy across the profession, upon learning that one is expecting, the priority must be to investigate the policies of the institution or group for which you work. Assess your family finances to understand how many weeks of unpaid leave you can afford to take and compare this against the amount of leave you are entitled to take. Many physicians will use a combination of paid sick leave and vacation days to cover the first few weeks after birth, then return part-time, if they are able.

If it is possible to do so, working additional shifts in the second trimester, when it poses less risk to the mother or baby, may be one way to bank additional paid time off work, or reduce the number of shifts, after the birth. It is also vital to allow for contingency within these plans, in case of extended post-partum recovery times or to look after your child in the early months. Speaking with hospital management early is key to planning effectively.

Writing for KevinMD.com, one physician complained, “We are the ones recommending that women exclusively breastfeed for a year – yet practice administrators dictate whether or not physicians can build 15-minute pumping breaks into their
requirements of the American Board of Medical Specialties (ABMS) and the Accreditation Council for Graduate Medical Education (ACGME)."

While the American Medical Women’s Association (AMWA) reports that 50% of female physicians have their first baby during residency training, many find themselves having to extend training by a year if the timing doesn’t work out.

Managing the Economics of Parental Leave

An experiment in California points to one possible solution for improving access to paid maternity leave for all working parents. It began in 2002, offering six weeks of wage replacement for workers who go on leave to bond with a new biological, adopted or fostered child. The scheme is paid out of an employee-paid, inflation-indexed payroll with no direct costs to employers, which would help small practices mitigate the impact of parental leave.

The scheme has been shown to be beneficial in terms of employee retention and, as a result, led to a reduction in the business costs associated with recruiting and training new workers, according to analysis by the Center for Economic and Policy Research. This is not insignificant when one considers that Stanford University recently reported that the cost of recruiting a new physician is in the range of $250,000 to $1m.

A Mixed Bag for Residents

While many teaching hospitals now provide allowances for parental leave with pay, this does not answer the practical problems of completing residency programs and the necessary hours within a specified year. As a result, says a New England Journal of Medicine study, “the personal and educational needs of trainees with children often collide with colleagues’ expectations, their hospital’s workforce needs, and the

schedules. We recommend that women do not return to work for eight weeks after a cesarean section, yet we don’t pay them.”

The Problems of Partnership

While large health systems or groups might offer more generous family leave packages, taking parental leave in a small practice can be problematic.

In most situations, partners will be expected to cover overhead costs while not drawing a salary. For small practices, the problem of covering for a physician that is absent for weeks at a time is particularly disruptive; and many physicians feel they cannot ask their partners to cover for them for the extended period of time they would like. Without effective coverage, the pressure to return to work is that much greater.

For the duration of the parental leave, other doctors must work harder and see the absent doctor’s patients, which may lead to a fall in revenue as a result. How this affects the partners and physician taking leave will vary from practice to practice, making it very difficult to plan financially.

Assess your family finances to understand how many weeks of unpaid leave you can afford to take and compare this against the amount of leave you are entitled to take.
As Gray Tuttle Jr. points out in Medical Economics, “With women forming an ever-larger percentage of the physician population, practices should think twice about letting maternity leave be an economic hardship for female doctors. If you want to recruit and retain women, you need competitive benefits.”

ABOUT THE AUTHOR
Melanie Grano is a freelance business writer and 20-year Journalism veteran who regularly contributes to career-based publications, including ThirdCertainty and Computer Times.
Are you thinking of relocating to the beautiful Pacific Northwest? Rainier Anesthesia Associates is growing and currently hiring full time and part time physician anesthesiologists. We are a physician owned private practice group that has been part of the South Sound community for 25 years. Located just south of Seattle, you will have access to both city life and outdoor life. We are long term partners with Multicare Health System, serving its facilities in east Pierce and King Counties along with several ambulatory surgery centers in our community. We are a progressive, well governed group and are looking for physicians who reflect our core values; integrity, compassion, excellence, leadership, and adaptability. There are ample opportunities to grow professionally, to become active in hospital leadership position and group governance. Above all, we care for each other as individuals and value work life balance. We strive to maintain a culture of fairness, compassion, integrity, and superb clinical care.

careers@rainieranesthesia.com

Great location, superb teamwork, quality residency, rewarding cases

We are looking to recruit dynamic faculty at all levels in all subspecialties to help make this a great Department. Maimonides Medical Center is an Independent Teaching Hospital with an Anesthesiology Residency covering a full range of cases. There are full time and part time positions with a competitive total compensation package commensurate with experience and responsibilities available. There are highly compensated night call positions available.

If you are interested, please contact me by email skonstadt@maimonidesmed.org or call 718-283-8301.

CHIEF – CARDIAC ANESTHESIOLOGY

The University of Rochester Dept. of Anesthesiology seeks a dynamic leader for the Div. of Cardiac Anesthesiology. Board certified cardiac anesthesiologist with fellowship training and significant experience as an academic cardiac anesthesiologist, and should be eligible for appointment as Associate or full Professor. Strong organizational and interpersonal skills, enabling candidate to be a successful leader as we develop a multidisciplinary cardiovascular service line. The cardiac anesthesia group has 8 fellowship-trained cardiac anesthesiologists providing service for over 1,200 adult cases annually including VAD, transplant, TAVR and ECMO. Opportunity to provide care outside cardiac OR, including in the CV ICU with appropriate training. Division has successful fellowship with 2 positions annually, filled with excellent candidates every year since accreditation.

CV research is central to the strategic mission of URMC, facilitated by presence of one of largest Centers for CV Research in the U.S. Anesthesia faculty lead University’s efforts in cardiac mitochondrial science and a nationally recognized program in Outcomes Research. Non-clinical time based on experience, goals, and funding.

Anesthesiology in Top U.S. Destination

*Employed positions minutes from the beach and amidst the tallest trees in the world!*

- New high tech surgical departments in a supportive and ambitious healthcare setting.
- Join an elite team of respected and welcoming physicians.
- Part of a very successful multi-specialty group offering physician-employed positions.
- Competitive pay, great benefits.

Lonely Planet, the largest travel guide book publisher in the world, named our coastal redwood forests as the #1 destination in the US for 2018. We are minutes from pristine Pacific Ocean beaches and surrounded by ancient redwoods that are the tallest trees in the world. In 2017, Eureka was awarded a California Cultural Site designation for its history and commitment to the arts and local culture.

Humboldt has previously been recognized by Outdoor Magazine, National Geographic, Backpacker Magazine, USDA Most Scenic Rural County, and by Men’s Journal (as one of the top seven places to “buy land in paradise”).

We are rural—about five hours drive north of San Francisco—but we have sophisticated cultural and social amenities, a thriving locavore tradition, and our local regional airport has daily direct flights to and from San Francisco and Los Angeles.

Anesthesia and Analgesia Medical Group, Inc (AAMGI), is a privately owned, physician run practice, currently seeking anesthesiologists to fill the company’s growing needs. Established in 1991, AAMGI is the premier perioperative care provider in Sonoma County with its headquarters located in Santa Rosa, CA about an hour north of San Francisco. AAMGI has longstanding relationships with, and contracts across, a diversified number of leading hospitals and ASC providers in Northern California. AAMGI is currently experiencing growth which necessitates hiring additional anesthesiologists.

Join a stable, well-respected practice of over 50 physicians. Duties include General Anesthesia, OB, Trauma, Pediatrics, Chronic Pain, Regional Blocks and Epidurals.

AAMGI offers a highly competitive compensation package as well as an option for either full-time or part-time responsibilities. Income varies based upon the amount of hours worked and call taken by the individual physician. Please inquire regarding additional benefits.

Whether you enjoy wining and dining in the NAPA/Sonoma areas, surfing and kayaking the Pacific Ocean, mountain biking where the sport originated, shopping in San Francisco, or a weekend trip to Lake Tahoe, everything is in close proximity to where we work. You will find Northern California to be a rewarding choice, thanks to its diversity, history, temperate weather, and vast selection of activities for individuals and families. Sonoma and Napa counties provide a great backdrop as you embark on your new career. Our community is great for families, with great public and private schools from pre-k to med school. Whether you enjoy being active or prefer to relax, or a combination of both, this is the area you want to be.

For more information about these opportunities, please visit our website at www.aamgi.com OR visit our employment page at www.aamgi.com/work-for-aamgi
100% of our revenue stays with the practice. Where does yours go?
