

Quick Tips for Rearranging Furniture

If you've been thinking about a new layout for your bedroom, living room or office, follow these steps to easily rearrange any space.

Go in With a Vision ✓

Decide what you want to accomplish with the layout (space for a desk, kid's play area, etc.). Find inspiration on Pinterest, Houzz or other home design sites.

Measure Your Space ✓

Accurate measurements of the room and furniture will streamline the process, so you don't have to guess and check.

Draw it Out ✓

Create a scale drawing so you know where everything needs to go. Let one inch equal one foot. Consider typical traffic patterns and leave enough space to access closets, outlets and doors.

Use an App ✓

Design apps can create a digital mockup of your new arrangement. Here are a few to try:

- **MagicPlan**
(iOS, Android)
- **Hutch**
(iOS, Android)
- **Décor Matters**
(iOS Only)
