CVV洗料四大.txt

黑料群，出四大，卡料.txt

四大件cvv.txt

The data set is the textual chat log of Chinese cybercriminals in underground QQ groups. File name is the group name. Most of the chat logs are textual posts in underground market. The goal of this collection was to understand and analyze cybercriminal language. The data was collected manually by downloading chat logs after joining in underground QQ groups for a period of time.

Each post starts with a line showing posting time, poster QQ nickname and ID, such as “2016-03-18 12:08:20 烟草的味道(473750304)”. Some posters add image with their chat, but the image is not recorded in the file and is shown as “[图片]”.
