

I learned at a young age that hard work pays off, unfortunately, it seems that our leaders in Columbia may not have been taught that lesson. It is time that Horry County had a true public servant who knows that lesson and will bring needed improvements to our community!

I will work for the citizens of District 33 and The Grand Strand. We have 1,440 minutes every day of our life. As a father of 5, grandfather of 5 and a small business owner, I do not want to waste any of them. It is time to send someone to Columbia who wants to take action, not simply make another speech.

I will ensure our government's waste of money is put to a stop. It seems as though we have lost sight of the value of a dollar. What we don't value, we waste, and what we waste is lost.

I will never have the phrase "long term incumbent" before my name. I believe in true citizen legislators and I do not plan to make my career as a politician. It is time for new people, new ideas and new energy for District 33.

I will make sure that our wonderful Grand Strand gets our fair share of funds from Columbia. For nearly a quarter century we have not received adequate funding for our roads, our infrastructure, or our education programs. This must change now!
