

ALCATEL-LUCENT:
Consume less energy?
ICT, we need more of it

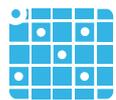

Philippe Richard

June 2013

ALCATEL-LUCENT GETTING TO KNOW US

lightRadio™ a technology breakthrough, the size of a Rubik's cube, delivers lightning fast Internet, consumes less power than a **60W** light bulb and supports **30+** users

80+ power utility networks **WORLDWIDE** use our smart grid solution to save money, prevent outages and decrease their carbon footprint

We have laid **1.284M+** km of **100G** optic fiber- enough to go around Earth **32** times

We have laid **500,000+** km of undersea cable - enough to go around Earth **12.5** times

Our **FP3** and **PSE** chips each support speeds of **400 Gb/s**, equivalent to **70,000** users each watching a HD video **SIMULTANEOUSLY**

80+ railway operators **WORLDWIDE** use our equipment to ensure millions of on-time, safe, connected journeys

1+ in **3** people **WORLDWIDE** connect to the Internet from home via our equipment

We even have a **YELLOW SUBMARINE (ROV)!**

LARGEST INSTALLED BASE IN THE WORLD - GROUND, AIR AND SEA

PLATFORM,
NO COMPROMISES

"Our routing systems sit at the massive intersections of the Internet, where billions of individual messages are directed every second. Our technology provides more capacity and more flexible traffic management with reduced energy consumption, helping to ensure better performance from global broadband networks."

Basil Alwan
President, IP Division

ECO-SUSTAINABILITY ACHIEVEMENTS & COMMITMENTS

KEY ACHIEVEMENTS

+25% INCREASE IN ENERGY EFFICIENCY
OF KEY PRODUCTS

-24% DECREASE IN CARBON FOOTPRINT VS 2008

Eco-innovations

- LIGHTRADIO™ : reduce energy consumption of mobile networks by **50%**
- FP3 PROCESSOR: **50%** less power
- 7950 EXTENSIBLE ROUTING SYSTEM (XRS): **66%** less power to reduce the eco impact of IP networks

Bell Labs

GreenTouch™, making networks **1,000** times more energy efficient

PERFORMANCE TARGETS

-50%
DECREASE IN CARBON FOOTPRINT BY 2020

Eco-innovations

+75%
INCREASE IN ENERGY EFFICIENCY FOR LIGHTRADIO™ BY 2015

The Greenhouse Gas Protocol Initiative
The foundation for sound and sustainable climate strategies

INNOVATION CHALLENGES

Lower relative VENTURE CAPITAL investments in Telecom

Telecom operators desire to minimize number of suppliers while maintaining innovation

FEWER PLAYERS
FUNDING BY LARGE SUPPLIERS

innovacom

Partnerships with startups and with customers

Direct and indirect funding

Annualized metrics:
500 startups evaluated
100 met and reviewed in detail

AT&T 15 actions
FOUNDRY
WHERE IDEAS ARE MADE

“open innovation” and “co-creativity” are key

CONCLUSIONS

ICT NETWORKS ARE GROWING RAPIDLY

- Scaling networks is becoming more difficult
- Bringing focus to energy efficiency

TRANSFORMING
ICT NETWORKS
FOR A
SUSTAINABLE
FUTURE

ICT AND RESEARCH COMMUNITIES ARE ORGANIZING TO ADDRESS CHALLENGES

- Dramatic, holistic change, but over long term evolution
- Cooperative organizations such as GreenTouch guiding (re)evolution

SEVERAL PROMISING RESEARCH DIRECTIONS AND INITIAL RESULTS HAVE BEEN OBTAINED
