

CREATE YOUR OWN NATION

Reclaim Your Sovereignty by Creating Your Own Decentralized Borderless Voluntary Nation (DBVN).

To create Your Nation on BITNATION you will need to think through your objectives and governance modalities. This form provides both guidance and a summary of the basic information required to set-up Your Nation. Right now the form is for gathering initial feedback. Once our website application is live, you'll be able to register Your Nation on BITNATION using the final version of the application form. After registering, you'll gain access to technical resources to create Your Nation, including DVBN code to run Your Nation on the Ethereum blockchain, tutorials on setting up your nation and access to a community of Nation Founders and developers, among other goodies.

We understand that Nations evolve. We will ensure that once you've created Your Nation's profile on BITNATION you'll be able to modify the information you've entered as your ideas develop and you learn more about Your Nation and its citizens needs.

When our Pangea software reaches Beta stage, you'll be able to transfer Your Nation onto the Pangea "Blockchain Jurisdiction", a DIY Governance Client that will enable you to operationalise Your Nation on a smart contract powered, peer-to-peer and end-to-end encrypted platform.

The form will take about an hour to fill-in. If you want to prepare your information in advance, you can access a pdf version here.

Note: the term DBVN first appeared in Bitnation's White Paper of October 2014:
