

Excels to CSVs - Paramatrix Technologies - ReadMe

Bot Overview

This bot performs the following:

- Converts each Excel file into a CSV file in one run.
- Just add all excel files with any number of columns to “Input Folder” and Run the bot.
- After running the bot, you can find your CSV files in “Output Folder”.

Pre-Requisites

- Automation Anywhere Enterprise Client v11.3.2
- Microsoft Excel

Installation

- Download the bot from Bot Store.
- Double click the installation file (.msi) and follow steps mentioned on screen.
- The Bot folder structure would be as follows:
 - <AA Application Directory> For Eg: “C:\Users\<username>\Documents\Automation Anywhere Files\”
 - Automation Anywhere
 - My Tasks
 - Bot Store
 - ExcelsToCSVs-ParamatrixTechnologies
 - My Tasks
 - My MetaBots
 - Input Folder
 - Output Folder
 - Error Folder

How to Use the BOT?

- Copy and paste all your Excel files in the “Input Folder” mentioned in the Bot Folder Structure.
- Run the bot.
- You can find all the converted CSVs in the “Output Folder” mentioned in the Bot Folder Structure.

Error Handling

- Application Not Found
 - Microsoft Excel should be installed for the bot to run.
- Excel File is currently open
 - Ensure that all the excel files to be loaded are “closed successfully” before running the bot.
- Excel Process is not responding
 - Ensure that Microsoft Excel Application can be opened without any problems.
