PLM User Creation – Readme

Bot Overview

This bot performs the following:

- The Bot fetches service requests raised in PLM Trace and create user accordingly and resolves the ticket.

Prerequisites

- Automation Anywhere Enterprise v11.3x
- User should pass the username and password for FlexPLM and response should be tested(authorized)
- User should pass the username and password for PLM Trace and response should be tested(authorized)
- Systems host file should be set up with the PLM's IP address
- Google Chrome plugin has to be enabled.
- If bot should run 24 hours then enable infinite loop.
- If we want to schedule the bot then do changes in No Incidents Found and kill all applications when no incidents are found and scheduled in control room.

Installation

- Download the bot from Bot Store.
- Double click on the .msi file.
- On Welcome to Installation wizard, click Next to continue.
- Click I agree to the terms in the license agreement radio button to accept the agreement.
- Get/Copy the License key from Bot Store Downloads into License Key, click Next to continue.
- Click Install to begin the installation.
- Click Finish to complete the installation.
- To view the installation, go to 'My Tasks' folder on AAE Client to see bot files.

Uninstall

- Open Add/Remove Programs -> Select the Bot/Digital Worker to be installed
- Click uninstall

Creates the following folder structure of the content in the AA Dir:

- <AA Directory>
 - My Tasks
 - Bot Store
 - Read Content-AA (Folder)
 - My Tasks
 - PLM_UserCreation
 - Error Log
 - AuditLog (Folder)
 - Error Logs Month-Day-Year.txt
 - EventLog (Folder)
 - Snapshots (Folder)
 - Error Snap Month-Day-Year.png
- Input Folder
 - User Config file
- Output Folder
