1. Introduction

This document contains all essential information for the user to make full use of this A2019 – Daily COVID-19 Report Bot. It includes a description of the functions and capabilities and step-by-step procedures for setup & configuration of the A2019 - Daily COVID-19 Report Bot.

1.1 Overview

- This bot reads the worldwide Coronavirus cases data from the WHO website and stores it in a CSV file and send an email with CSV file with confirmed cases and deaths.
- The WHO site gets updated every hour, so the user can execute the bot accordingly to receive updates every hour.

1.2 Use cases

The key use cases include:

1. Hourly monitoring of corona cases to avoid travel to a particular country.

2. Requirements & Pre-requisites

2.1 System Requirements

[Enterprise A2019 \(Cloud deployed\) and Community Edition device requirements.](#)

Review the machine hardware specifications, operating system versions, and browser types supported by Automation Anywhere Enterprise for creating and running bots and command packages as an Enterprise A2019 (Cloud deployed) or Community Edition user on your local machine.

2.2 Prerequisites

1. Automation Anywhere Enterprise A2019 installed.

3. Getting Started

3.1 Quick Start

3.1.1 Configuration and Use
