1. Introduction

This document contains all essential information for the user to make full use of this A2019 - Web Extractor (Google chrome). It includes a description of the functions and capabilities and step-by-step procedures for setup & configuration of the A2019 - Web Extractor (Google Chrome).

1.1 Overview

The bot searches and retrieves user-defined information using Google Chrome and populates all the data into an Excel sheet

1.2 Use cases

The key use cases include:

- Can be used to get required web data from Google Chrome into an Excel sheet.
- Crawl the web in search of specific information extraction

Key features:

1. The bot searches for the data as required by the user
2. The bot extracts the search results into an Excel sheet
3. Emails the user the contents of the web search

2. Requirements & Pre-requisites

2.1 System Requirements

[Enterprise A2019 \(Cloud deployed\) and Community Edition device requirements.](#)

Review the machine hardware specifications, operating system versions, and browser types supported by Automation Anywhere Enterprise for creating and running bots and command packages as an Enterprise A2019 (Cloud deployed) or Community Edition user on your local machine.
