1. Introduction

This document contains all essential information for the user to make full use of this A2019 Export - Import Multiple Bots Package. It includes a description of the functions and capabilities and step-by-step procedures for setup & configuration of the System Information Package.

1.1 Overview

Provides a way to export and import multiple bots at the same time through the list of bot names.

1.2 Use cases

The key use cases include:

- Get authentication token
- Export multiple bots at the same time
- Download the exported file to the specified folder
- Import repository bots from archive file.
- Check import status.

2. Requirements & Prerequisites

2.1 System Requirements

[Enterprise A2019 \(Cloud deployed\) and Community Edition device requirements.](#)

Review the machine hardware specifications, operating system versions, and browser types supported by Automation Anywhere Enterprise for creating and running bots and command packages as an Enterprise A2019 (Cloud deployed) or Community Edition user on your local machine.

2.2 Prerequisites

No specific prerequisites beyond the installation of A2019.

3. Getting Started

3.1 Quick Start

3.1.1 Setup

No special setup is required.

3.1.2 Configuration and Use

This package contains the following actions:

Export-Import Multiple Bots

- Export Multiple Bot.
- Get Auth Token.
- Check Import Status.
- Import Multiple Bot.

No	Action	Description	Parameters
