

PERFORMANCE TEST README

Bot Overview

This bot performs the following:

- This bot gives information about latency and throughput to the oracle cloud account and sends an email that contains an image displaying the results. The result will be stored in the Output Files folder in the downloaded zip.

Pre-Requisites

- Automation Anywhere Enterprise v10.7 or above.
- Make sure that the Output Files Folder does not contain a file named "testresult.png" when you run this bot.

Installation

- Download the bot from Bot Store.
- Double click on <Bot Name>.msi and follow the installation instructions.

For first time users, the "Bot Store" folder is created under <AA Directory>/My Tasks (on your local disk).

Create the following folder structure of the content in the AA Dir:

- <AA Directory>
 - o My Tasks
 - Bot Store
 - [Oracle] Performance Test (Folder)
 - o My Tasks
 - [Oracle] PerformanceTest.atmx
 - o Error Folder
 - Logs (Folder)
 - Error Logs Month-Day-Year.txt
 - Snapshots (Folder)
 - Error SnapMonth-Day-Year.png

How to Use the Bot:

Use the following information to configure your bot:

Parameter Name	Type	Direction	Additional Info
cloudAccountName	String	Input	This is the domain name of your oracle cloud account. Example - test
Username	String	Input	This is the username of the oracle cloud account. Example - test
Password	String	Input	This is the password of the oracle cloud account. Example - test
vErrorFolder	String	Input	This is error folder inside bot folder which contains Logs and Snapshots folder (Already defined, no need to add value unless want to change location of file).
vLogFolder	String	Input	This folder contains Log file in case of error (Already defined, no need to add value unless want to change location of file).
vSnapshotFolder	String	Input	This folder contains Screenshot in case of error (Already defined, no need to add value unless want to change location of file).

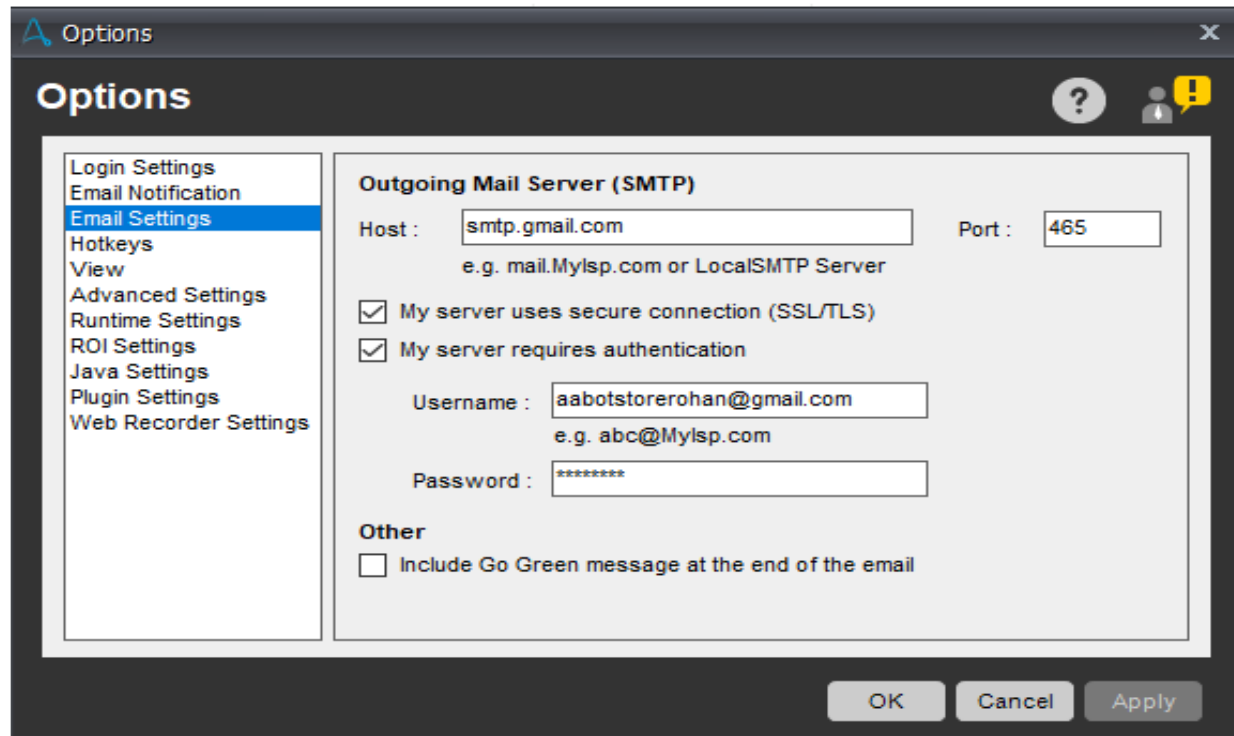

Error Handling

- Each Bot folder contains the below hierarchy.
 - o Error Folder
 - Logs
 - Error Logs Month-Day-Year.txt: In case of any error, this file logs error message along with time stamp
 - Snapshots
 - Error Snap Month-Day-Year.png: In case of any error, this file captures screenshot of error.
- Task Status of bot is set to failed in case of error.

Email Client Setup

In order to send email which is a part of the functionality of this bot, you have to set up email client in the AA client. This can be done as follows:

Go to Tools -> Options -> Email Settings in the AA client and put values as per the below screenshot.

The username is the email from which you want the email to be sent and the password is the password of that account.
