1. Introduction

This document contains all essential information for the user to make full use of this A2019 Bot. It includes a description of the functions and capabilities and step-by-step procedures for setup & configuration of the Bot.

1.1 Overview

This bot performs the following action:

- This bot will convert any Time unit from Hours to Seconds or Minutes using Inline Python Script.
- Input value (in number / integer) converted to the required Time Unit as output.

1.2 Use cases

The key use cases include:

This Bot can be used to convert Time unit from Hours to Seconds or Minutes using Inline Python Script.

This Bot can be used as an alternate to any API / 3rd Party Tool to convert any Time unit from Hours to Seconds or Minutes.

2. Requirements & Prerequisites

2.1 System Requirements

The Bot will work on Pure Cloud, Cloud-Enabled and Fully On-Prem deployment.

Operating system supported are Microsoft Windows (Windows 7/8/10 and Windows Server 2012/2016/2019) and Linux (Linux CentOS 7.7, Red Hat Enterprise Linux 7.7)

Enterprise A2019 can be hosted on AWS, Microsoft Azure, Google Cloud, IBM, and any public, private, or hybrid cloud service.

Only 64-bit operating system version supported.

Bot Creator tasks are supported with all the listed operating systems.

You cannot register a device that is running on a Linux system. The Bot agent cannot be installed on Linux systems. However, you can use a registered device running on a Windows system to access an Enterprise Control Room that is installed on a Linux system.

Supported Browsers with versions are as below:

Google Chrome : 57 or later

Microsoft Internet Explorer : 11

Microsoft Edge based on Chromium : 79 or later

Machine hardware specifications are as below:

Processor	RAM	Storage (free disk space)	
Intel Core i3 2.6 GHz (Minimum)	4 GB (Minimum)	32 GB	5Mbps
64-bit higher (Recommended)	8 GB (Recommended)		20Mbps or

2.2 Prerequisites

Automation Anywhere A2019 Cloud / On Prem / Community Edition Version

Python Is required to be Installed and Environment Variable Path for Python is required to be set for the system/machine.

3. Getting Started

3.1 Quick Start

3.1.1 Setup

Download the Bot in A2019 Edition of Automation Anywhere Cloud / On Prem / Community Edition Version to be ready to use from A2019.

3.1.2 Configuration and Use

Bot named “Time Conversion using Python” is ready to use Bot.
For Configuring the Bot –

INPUT VARIABLES: Input Variables to be mentioned in this Table				
Variable Name	Type	Mandatory	Purpose	Example Input
Prompt: For value	Number	Yes	Input the value in Time Unit of Hours you want to convert to Seconds or Minutes	5Hrs (Time in hours as Input)

OUTPUT VARIABLES: Output Variables to be mentioned in this Table.				
Variable Name	Type	Mandatory	Purpose	Example Output
prompt-assignment	String	Yes	The resulting Converted Time Unit Value	300 Mins / 18,000 Secs (Time Unit as Output)

Just give your input value as Integer/number in the Prompt for value in the time unit of Hours you want to convert to in Minutes or in Seconds as required and Get the converted value in the required unit of Time in Seconds / Minutes as Output using Inline Python Script.

4. Support & FAQs

4.1 Support

Free bots are not officially supported. You can get access to Community Support through the following channels:

- You can get access to Community Support, connecting with other Automation Anywhere customers and developers on [APeople](#) – the [Bot Building Forum](#), the [Bot Store Support Forum](#), or the [Developers Everywhere Group](#).
- Automation Anywhere also provides a [Product Documentation portal](#) which can be accessed for more information about our products and guidance on [Enterprise A2019](#).

4.2 FAQs

For questions relating to Enterprise A2019: See the [Enterprise A2019 FAQs](#).

Appendix A: Record of Changes

No.	Version Number	Date of Change	Author	Notes
1.	Time Conversion using Python v1.1	25/01/2021	Rajat Nandi	New version with more features/options coming soon.
