1. Introduction

This document contains all essential information for the user to make full use of this [A2019 – Length & Weight Converter Assistant by AARI for Desktop](#). It includes a description of the functions and capabilities and step-by-step procedures for setup & configuration of the [A2019 – Length & Weight Converter Assistant by AARI for Desktop](#).

1.1 Overview

This Automation will convert the input value which is entered by the user into different units like Gram, Kilogram, Ton, Pound, & Ounce Units.

The same way this Automation will convert the input value which is entered by the user into different units like Kilometer, Centimeter, Mile, Yard, Units.

As per user's requirement he/she can select any conversion unit and this automation will convert that number into all the available unit in the list.

User can generate the excel file as well for the same.

1.2 Use cases

The key use cases include:

In science and engineering, the weight of an object is the force acting on the object due to gravity. Some standard textbooks define weight as a vector quantity, the gravitational force acting on the object. Others define weight as a scalar quantity, the magnitude of the gravitational force.

There are many units to measure weight, as per convenience person can use any unit that comes under weight.

This automation will help user to convert the weight number that input by user and with the selected unit from the dropdowns for easy user-friendly.

User can create a excel file as well for that input if user need to log the information.

2. Requirements & Prerequisites

2.1 System Requirements

[Enterprise A2019 \(Cloud deployed\) and Community Edition device requirements.](#)

Review the machine hardware specifications, operating system versions, and browser types supported by Automation Anywhere Enterprise for creating and running bots and command packages as an Enterprise A2019 (Cloud deployed) or Community Edition user on your local machine.

2.2 Prerequisites

User should have a **A2019** installed to take a benefit of this automation.

User should have a **Python-3** installed to take a benefit of this automation.

3. Getting Started

3.1 Quick Start

3.1.1 Configuration and Use

- Download the Bot from the Bot-store.
- Check the downloaded bot in your local machine private/Public section.
- Once Bot is downloaded you are good to go for a run.
- Please change the OutputPath to your required path into the configuration file to generate the CSV file.
- By Default, it will generate the CSV file under **C:\Weight Converter Assistant. OR C:\Length Converter Assistant.**
- Users need to run **MasterBot** for view AARI for Desktop interface

- o For Configuring the Bot –

| INPUT VARIABLES: Input Variables to be mentioned in this Table | | | | |
|---|-------------|------------------|----------------------|---|
| Variable Name | Type | Mandatory | Purpose | Example Input |
| OutputPath | String | Yes | To generate CSV file | OutputPath= D:\My Desktop\BOT STORE\Folder Name |

4. Support & FAQs

4.1 Support

Free bots are not officially supported. You can get access to Community Support through the following channels:

- You can get access to Community Support, connecting with other Automation Anywhere customers and developers on [APeople](#) – the [Bot Building Forum](#), the [Bot Store Support Forum](#), or the [Developers Everywhere Group](#).
- Automation Anywhere also provides a [Product Documentation portal](#) which can be accessed for more information about our products and guidance on [Enterprise A2019](#).

4.2 FAQs

For questions relating to Enterprise A2019: See the [Enterprise A2019 FAQs](#).

Appendix A: Record of Changes

| No. | Version Number | Date of Change | Author | Notes |
|-----------|----------------|-------------------|---------------------|------------|
| 1. | <i>1.0</i> | <i>15-03-2021</i> | <i>Manav Parmar</i> | <i>N/A</i> |
