## 1. Introduction

---

This document contains all essential information for the user to make full use of this A2019 - Google Drive Backup. The bot prompts for the User to generate a Backup Folder with system date in Google Drive which is used to store files on their servers, synchronize files across devices, and share files etc.

### 1.1 Overview

- The user can generate a Backup Folder in the Google Drive for storing files as backup
- Prompts for the Folder Path and selects the required Folder
- Folder will be copied from the User defined Folder Path to the Google Drive
- New Backup Folder with the System date will be generated inside the pre-defined folder at Google Drive

### 1.2 Use cases

The key use cases include:

1. Easy to access the Backup files from Google Drive anytime from anywhere
2. Can Use the system date for finding required backup files from large number of data
3. Large number of files can be stored
4. Secure and No size restrictions for the files
5. Time saving
6. Fast and Efficient

## **2. Requirements & Pre-requisites**

---

### **2.1 System Requirements**

#### **[Enterprise A2019 \(Cloud deployed\) and Community Edition device requirements.](#)**

Review the machine hardware specifications, operating system versions, and browser types supported by Automation Anywhere Enterprise for creating and running bots and command packages as an Enterprise A2019 (Cloud deployed) or Community Edition user on your local machine.

### **2.2 Prerequisites**

1. Automation anywhere enterprise A2019 installed.
2. Desktop Google Drive should be installed in the System.
3. User need to be logged in to the Google Drive/ Google Account before the bot runs
4. Pre-defined Folder at Google Drive for storing the backup folder/files (if needed)

### 3. Getting Started

#### 3.1 Quick Start

#### 3.2 Configuration and Use

OUTPUT VARIABLES: Output Variables to be mentioned in this Table.					
Variable Name	Type	Mandatory	Purpose	Direction	Example
vDateFolder	String	Yes	This creates an output folder with the system date	Output	NOTE: This variable should be configured with System date
vLogFolder	String	Yes	This folder contains Log file in case of error (Already defined, no need to add value unless want to change location of file).	Input	NOTE: This variable should be configured with LogFolder

## 4. Support & FAQs

---

### 4.1 Support

Free bots are not officially supported. You can get access to Community Support through the following channels:

- You can get access to Community Support, connecting with other Automation Anywhere customers and developers on [APeople](#) – the [Bot Building Forum](#), the [Bot Store Support Forum](#), or the [Developers Everywhere Group](#).
- Automation Anywhere also provides a [Product Documentation portal](#) which can be accessed for more information about our products and guidance on [Enterprise A2019](#).

### 4.2 FAQs

For questions relating to Enterprise A2019: See the [Enterprise A2019 FAQs](#).
