1. Introduction

This document contains all the essential information for the user to make full use of this A360 Bot. It includes a description of the functions and capabilities and step-by-step procedures for setup & configuration of the Bot.

1.1 Overview

The Bot will be used to delete the junk files and folders from your local system in order to clean your hard disk and maintain your CPU utilization.

1.2 Use cases

The Bot will create mandatory folders (like Project Folder, Logs folder, Audit Log Folder, Error Log Folder, Process Folder, UnProcess Folder, Extension type Folder, etc.) if not present in the system and then check if files or folders like

- a. C:\Windows\Prefetch, C:\Windows\Temp
- b. C:\Users*iStrDeviceUFName1*\Recent
- c. C:\Users*iStrDeviceUFName2*\AppData\Local\Temp

exist in a given system folder. Loop for each file in folder and delete all files in that folder. Loop for each folder in folder and delete all folder.

2. Requirements & Prerequisites

2.1 System Requirements

[Enterprise A2019 \(Cloud deployed\) and Community Edition device requirements.](#)

Review the machine hardware specifications, operating system versions, and browser types supported by Automation Anywhere Enterprise for creating and running bots and command packages as an Enterprise A360 (Cloud deployed) or Community Edition user on your local machine.

2.2 Prerequisites

- a. User should have a A360 installed to take a benefit of this automation.
- b. User should use a Folder package -6.4.0.
- c. User should use a File package -6.4.0.
- d. To know this variable input name, you have to press (Windows key+r) enter recent and extract this variable folder name from actual path
e.g. [C:\Users\\${iStrDeviceUFName1\$\Recent]
- e. To know this variable input name you have to press (Windows key+r) enter %temp% and extract this variable folder name from actual path
e.g. [C:\Users\\${iStrDeviceUFName2\$\AppData\Local\Temp]

3. Getting Started

3.1 Quick Start

3.1.1 Configuration and Use

- Download the Bot from the Bot-store.
- Check the downloaded bot in your local machine private/Public section.
- Once Bot is downloaded you are good to go for a run.
- Check if files or folder present in a given system folder and Delete files and folders.

- For Configuring the Bot –

INPUT VARIABLES: Input Variables to be mentioned in this Table				
Variable Name	Type	Mandatory	Purpose	Example Input
iStrProjectFolder	String	Mandatory	To create the folder path	User given path For(e.g.D:\Project name)
iStrDeviceUFName1	String	Mandatory	To access the system folder path we need device user name	C:\Users\\${iStrDeviceUFName1}\Recent
iStrDeviceUFName2	String	Mandatory	To access the system folder path we need device user name	C:\Users\\${iStrDeviceUFName2}\AppData\Local\Temp

OUTPUT VARIABLES: Output Variables to be mentioned in this Table.				
Variable Name	Type	Mandatory	Purpose	Example Output
oNumErrorLineNumber	Number	Mandatory	Error line number	oNumErrorLineNumber
oStrErrorMessage	String	Mandatory	Error Message	oStrErrorMessage

4. Support & FAQs

4.1 Support

Free bots are not officially supported. You can get access to Community Support through the following channels:

- You can get access to Community Support, connecting with other Automation Anywhere customers and developers on [APeople](#) – the [Bot Building Forum](#), the [Bot Store Support Forum](#), or the [Developers Everywhere Group](#).
- Automation Anywhere also provides a [Product Documentation portal](#) which can be accessed for more information about our products and guidance on [Enterprise A2019](#).

4.2 FAQs

For questions relating to Enterprise A2019: See the [Enterprise A2019 FAQs](#).
