1. Introduction

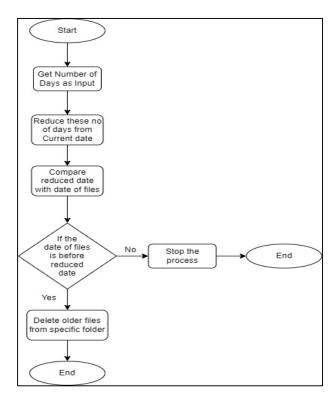

This document contains all the essential information for the user to make full use of this A360 Bot. It includes a description of the functions and capabilities and step-by-step procedures for the setup & configuration of the Bot.

1.1 Overview

In this Bot, the user will provide input as a number of days. This number of days will be reduced from the current date and then this date will be compared with the modified date of files from the specific folder. The Bot will delete the files if the modified date of the files is older than the difference date and all the remaining files will be kept as it is.

As per Users demand Bot will delete the files.

1.2 Use cases

2. Requirements & Prerequisites

2.1 System Requirements

Enterprise A2019 (Cloud deployed) and Community Edition device requirements.

Review the machine hardware specifications, operating system versions, and browser types Automation Anywhere Enterprise supports creating and running bots and command packages as an Enterprise A2019 (Cloud deployed) or Community Edition user on your local machine.

2.2 Prerequisites

- 1. User should have an A2019 installed to take benefit of this automation.
- 2. User should be using a Folder package.
- 3. User should be using a File package.
- 4. User should be using a Loop package

3. Getting Started

3.1 Quick Start

3.1.1 Configuration and Use

- 1. Download the Bot from the Bot-store.
- 2. Check the downloaded bot in your local machine private/Public section.
- 3. Once Bot is downloaded you are good to go for a run.
- 4. The Bot will delete the files if the modified date of files is older than the difference date and all the remaining files will be kept as it is.
