

BPXP Gulf of Mexico Annual Summary of Safety Incidents and Hydrocarbon Spills

2015 Calendar Year

2015 BPXP Gulf of Mexico Recordable Safety Incidents Summary

Recordable Safety Incidents	Days Away from Work Cases or Restricted Work Cases Resulting from Recordable Safety Incidents
16	9

Notes:

1. "Recordable Safety Incident" is defined to mean any incident that is required to be reported under 30 CFR 250.188 (a)(1) or (a)(2). 30 CFR 250.188 (a)(1) includes the reporting of fatalities. There were no fatalities on BPXP facilities in 2015.
2. Days away from work cases means those cases described in 30 CFR 250.188 (b)(1).

2015 BPXP Gulf of Mexico Hydrocarbon Spills Summary

Volume Range	Number of Hydrocarbon Spills*	Total Volume of Hydrocarbon Spills per Category (barrels)*
Sheen of unknown origin:	12	Sheen**
<1 barrel:	70	3.8
≥1 barrel to <10 barrels:	1	6.8
≥10 barrels:	0	0
	Total Volume:	10.6

Notes:

- * Any spill that is required to be reported under 30 CFR 254.46(a) or (b).
- ** No volume amount is allocated for sheens of unknown origin.
- 1. "Hydrocarbon" does not include substances that are excluded from the definition of "oil" in 30 CFR 254.6.
- 2. "Hydrocarbon Spills" does not include federally permitted releases or spills of hazardous substances otherwise reportable to the National Response Center under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA).
- 3. In addition to the hydrocarbon spills, BPXP reported to the NRC and BSEE one seafloor broach of synthetic oil-based drilling mud that migrated to the seafloor either through unobserved natural fractures or low strength soils. The volume of material released is not known; the area of seafloor over which the release was observed was slightly less than 0.2 acres.
