

BPXP Gulf of Mexico Annual Summary of Safety Incidents and Hydrocarbon Spills

2017 Calendar Year

2017 BPXP Gulf of Mexico Recordable Safety Incidents Summary

Recordable Safety Incidents	Days Away from Work Cases or Restricted Work Cases Resulting from Recordable Safety Incidents
9	11

Notes:

1. "Recordable Safety Incident" is defined to mean any incident that is required to be reported under 30 CFR 250.188 (a)(1) or (a)(2). 30 CFR 250.188 (a)(1) includes the reporting of fatalities. There were no fatalities on BPXP facilities in 2017.
2. Days away from work/restricted work cases means those cases described in 30 CFR 250.188 (b)(1).

2017 BPXP Gulf of Mexico Hydrocarbon Spills Summary

Volume Range	Number of Hydrocarbon Spills*	Total Volume of Hydrocarbon Spills per Category (barrels)*
Sheen of unknown origin:	15	N/A **
<1 barrel:	48	1.939
≥1 barrel to <10 barrels:	0	0
≥10 barrels:	1	71 ***
Total Volume:		72.939 ****

Notes:

* Any spill that is required to be reported under 30 CFR 254.46(a) or (b).

** No volume amount is allocated for sheens of unknown origin.

*** Synthetic-oil based mud spill originally estimated at 90 barrels and confirmed to be 71 barrels

**** Approximately 0.381 barrels were reported as recovered from the Gulf of Mexico after the spill occurred

1. “Hydrocarbon” does not include substances that are excluded from the definition of “oil” in 30 CFR 254.6.
2. “Hydrocarbon Spills” does not include federally permitted releases or spills of hazardous substances otherwise reportable to the National Response Center under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA).
