

Sprockets, Clutches & Chains-Group

Drive Group Components

Our supply stores carry a complete range of drive group components for pump drives and drawworks. Experienced staff is there to assist you in selecting the right components to get the most out of your equipment.

PNEU Grip Clutches

We are a PNEU Grip distributor and carry a full range of clutches from the 12" back brake to the 32" engine clutch. We also have dual clutch assemblies.

Clutch Drums

We have standard clutch drums in stock and can also custom build a drum to your specifications.

Sprockets

We stock many standard sprocket sizes for pump drive applications and can manufacture new sprockets to fit your drive specifications

Diamond Roller Chains

We also stock various sizes of Diamond roller chain. If we don't have it in stock we can usually get it the same day.
