

B&A Planning Group

Passion to create better communities, together.

GIS, 3D & Technical Services

Our GIS, 3D and technical services team is well versed in the leading edge technologies and software applications used to inform and support planning assignments. The team possesses a diverse range of expertise in AutoCAD, GIS, 3D and graphic design software and plays an integral role in supporting a wide range of planning initiatives. Our 3D model making can help in evaluating development alternatives and communicating finalized plans in a visually effective and clear manner.

Our Services Include

- + Specialized mapping
- + Data acquisition & management
- + Digital elevation models
- + Slope analysis
- + Spatial analysis
- + 3D visualization & animation
