

AWS (Amazon Web Services) CLOUD SERVER

* GOOD TO KNOW

1. You do not need to buy a server, but all computers, laptops, and tablets must still meet the minimum terminal requirements.

2. BiotrackTHC will fully manage, update, and backup your AWS Server. You can easily add additional locations and more storage space as needed as your business scales out.

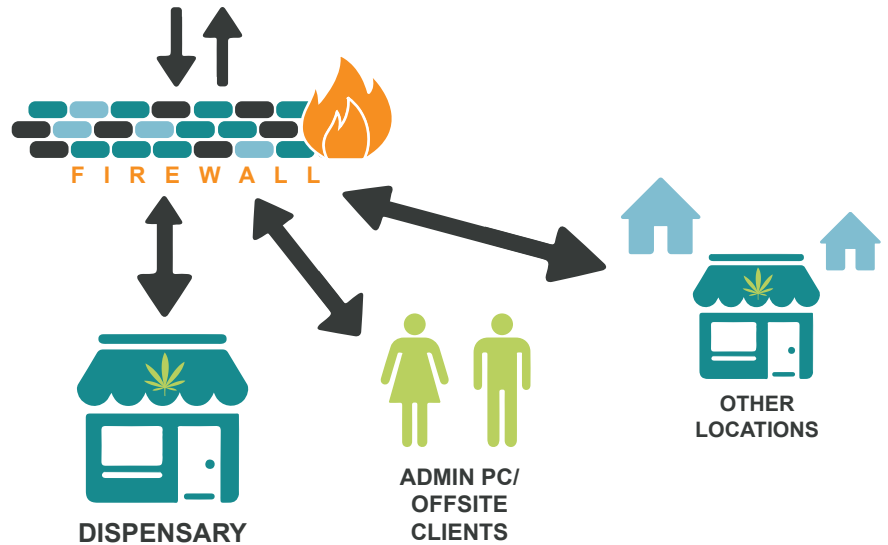

12 Month Commitment

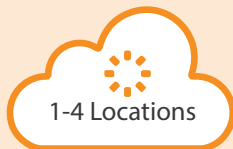

if you commit for 12 months, you get 2 free months. Otherwise, it is normal terms and no free month.

** Additional terms and conditions apply**

HOW IT WORKS

1 CHOOSE YOUR SERVER

AWS C 2XL Instance
15 GB Cloud Server

or

AWS C. 4XL Instance
30 GB Cloud Server

3 Know There Will Be Some Usage Fees

Data Transfer/Running Hours
Cost = Variable** (Typically
\$100-200/month)

Ancillary Fees Based on Usage

EBS-Optimized--Optimized configuration stack and provides additional, dedicated capacity for Amazon EBS I/O

EC2 Running Cost -EC2 fees associated (key management & notification services, elastic IP, etc)

Data Transfer--Data Transfer Charges in and out of the server--\$.10/GB

2 IMPLEMENTATION

AWS Server Billing will begin as soon as your AWS Server is created.

Compare this to typical cable TV billing. As soon as you sign up, your billing begins, even though you may not be watching any channels.

Biotrack Software License Monthly Billing will not begin until you are ready to go LIVE. We take you and your team through the onboarding and training process before we begin Biotrack's monthly billing.
