# Simple, Scalable, Flexible

Honeywell's NetAXS-123 is a web-based access control solution that puts you in control. Simple and intuitive menus, combined with full access control capabilities, allows you to easily secure doors and manage employee access.

## It's Simple to Use

- Access your system from any Internet connected computer to quickly make informed decisions
- NetAXS features a simple to use Web interface that eliminates the need for system management software

## It's Scalable

- Modular access control gives you more for your money. You can buy as little or as much access as you need
- Edge panel installation lowers at-the-door costs and makes access control more affordable

## It's Flexible

- Connect multiple panels to your existing network and use a single IP address for system access
- Supervisor mode helps reduce false alarms by preventing access when the system is armed

# Applications

Perfect for small business owners, NetAXS-123 offers the scalability to easily and affordably expand your system one door at a time. It's ideally suited for:

- Professional Offices
- Commercial Sites
- Retail Outlets
- Manufacturing Facilities
- Medical Offices
- Light Industrial
- Education
- Transportation
- Warehousing

The user-friendly design makes it easy to operate and maintain. With a browser-based interface, your learning curve and training time are significantly decreased. And you don't need to have a dedicated PC—simply log on and you're ready to go, securely—from the office or anywhere.

NetAXS-123's edge-based design helps reduce wiring by bringing control right to the door. Reduced wiring means lower cost to install, allowing you to secure more doors versus traditional access control solutions.
